Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity Timothy G. O'Higgins,2020 Aquatic ecosystems are rich in biodiversity and

home to a diverse array of species and habitats providing a wide variety of benefits to human beings. Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures including pollution, contamination, invasive species, overfishing, and climate change. Such pressures threaten the sustainability of these ecosystems, their provision of ecosystem services, and ultimately human well-being. Ecosystem-based management (EBM) is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection, and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision-making. This open access book introduces the essential concepts and principles required to implement ecosystem-based management, detailing tools and techniques and describing the application of these concepts and tools to a broad range of aquatic ecosystems, from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta.

Re-Thinking Green Robert Higgs, 2005-07-15. Environmental quality has been a major public concern since the first Earth Day in 1970, yet the maze of environmental laws and regulations enacted since then has fostered huge government bureaucracies, better known for waste and failure than for innovation and success. Can we do better than this failed environmental bureaucracy? The noted contributors to this volume answer with a resounding yes. *Re-Thinking Green* exposes the myths that have contributed to failed environmental policies and proposes bold alternatives that recognize the power of incentives and the limitations of political and regulatory processes. It addresses some of the most hotly debated environmental issues and shows how entrepreneurship and property rights can be utilized to promote environmental quality and economic growth. *Re-Thinking Green* will challenge readers with new paradigms for resolving environmental problems, stimulate discussion on how best to humanize environmental policy, and inspire policymakers to seek effective alternatives to environmental bureaucracy.
