Requirements for the Control of Electromagnetic Interference Characteristics of Subsystems and Equipment

Department of Defense, 2015-03-02 MIL STD 461G 2 March 2015 contains some of the most recent information on Electromagnetic Pulse EMP and protection of the Electromagnetic Environment EME for DoD equipment. Unfortunately, there is very little current information describing how best to protect an entire facility from intentional electromagnetic interference IEMI. Although this standard is best suited for items such as electronic enclosures that are no larger than an equipment rack, electrical interconnections that are discrete wiring harnesses between enclosures and electrical power input derived from prime power sources, the technical aspects are equally relevant to facilities design and construction. The principles in this standard may be useful as a basis for developing suitable requirements for facility design and construction. This MIL STD provides guidance on frequency scanning, emission identification, susceptibility testing, susceptibility requirements, limits, and test procedures for equipment installed in mission-critical facilities. This book is even more important nowadays as nations like China combine information warfare, electronic warfare, and space warfare to create intelligentized warfare. Why buy a book you can download for free? We print this book so you don't have to. First, you gotta find a good, clean, legible copy and make sure it's the latest version, not always easy. Some documents found on the web are missing some pages or the image quality is so poor they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there, including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people, typically it's either out of paper or toner. If it's just a 10-page document, no problem, but if it's 250 pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com. This book includes original commentary, which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly bound, full size 8 1/2 by 11 inches, with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. If you like the service we provide, please leave a positive review on Amazon.com www.USGOVPUB.com
