The Homely Mind of Multiple Realities Ken Evans, 2018-12-07 This Book this Essay began as a response to Peter Berger et al s The Homeless Mind and their concerns for the influence of Modernism on Societies My interests and focus is both broader and wider taking in the intellectual roots of western sociology and the earliest historical roots of the European Home drawing on Sociological Biography Phenomenology Multiple Realities DIY techniques Philosophy Poetry Consciousness and Spirituality also with brief references to my cat Usually each one of these would stand alone perhaps as a conventional essay But to combine them into a single entity and to maintain a flow between ideas with varied resonances required something more integrative in this case derived from the spirit of Husserl s phenomenology the Epoque freely applied throughout not only to signify the tentativeness of personal opinion but also as an example of multiple realities and as tributaries of thought and beliefs feeding the great river of civilisation The Homely Mind of the title of this essay is one more of a certain hope than achievement as it might possibly be in most cases of all times and all places So in the meantime the best we can do is to endeavour to keep the home fires burning as that sign of the sacred flame of life

Theory of Addiction Robert West, Jamie Brown, 2013-08-14 The word addiction these days is used to refer to a chronic condition where there is an unhealthily powerful motivation to engage in a particular behaviour This can be driven by many different factors physiological psychological environmental and social If we say that it is all about X we miss V W Y and Z So some people think addicts are using drugs to escape from unhappy lives feelings of anxiety and so on many are Some people think drugs become addictive because they alter the brain chemistry to create powerful urges that is often true Others think that drug taking is about seeking after pleasure often it is Some take the

view that addiction is a choice addicts weigh up the pros and cons of doing what they do and decide the former outweigh the latter Yet others believe that addicts suffer from poor impulse control that is often true And so it goes on When you look at the evidence you see that all these positions capture important aspects of the problem but they are not complete explanations Neuroscience can help us delve more deeply into some of these explanations while the behavioural and social sciences are better at exploring others We need a model that puts all this together in a way that can help us decide what to do in different cases Should we prescribe a drug give the person some tender loving care put them in prison or what Theory of Addiction provides this synthesis The first edition was well received Throughout the book the reader is exposed to a vast number of useful observations The theoretical aims are timely refreshing ambitious and above all challenging It opens up a new way of looking at addiction and has the potential to move the field of addiction a considerable leap forward Thus we wholeheartedly would like to recommend the book for students as well as scholars Read and learn Nordic Studies on Alcohol and Drugs The book provides a comprehensive review of existing theories over 30 in all and this synthesis of theories constitutes an important contribution in and of itself West is to be commended for his synthesis of addiction theories that span neurobiology psychology and social science and for his insights into what remains unexplained Addiction This new edition of Theory of Addiction builds on the first including additional theories in the field a more developed specification of PRIME theory and analysis of the expanding evidence base With this important new information Theory of Addiction will continue to be essential reading for all those working in addiction from student to experienced practitioner as urged above Read and learn
