

**Step 1: Construct a circle through three points not on a line.**

- a) Points D, E, and F are not in a line. To construct a circle through points D, E, and F, begin by drawing line segments  $\overline{DE}$  and  $\overline{EF}$ . Then construct the perpendicular bisectors of  $\overline{DE}$  and  $\overline{EF}$ , and name the point of intersection of the perpendicular bisectors O. How do you know that point O is the center of the circle that passes through the three points? (10 points)

Both of the perpendicular bisectors will pass through the circle. The point O will be the center of the circle with points passing through DE and EF. The intersection of the perpendicular bisectors will be the center of the given circle passing through D, E, and F.
