Violence and Civilization Jonathan Fletcher,2013-04-23 This book provides an introduction to the work of Norbert Elias It is the first systematic appraisal of two central themes of his thought violence and civilization Although Elias is best known for his theory of civilizing processes this study highlights the crucial importance of the concept of decivilizing processes Fletcher argues that while Elias did not develop a theory of decivilizing processes such a theory is logically implied in his perspective and is highly pertinent to an understanding of the most violent episodes of twentieth century history such as the Nazi genocides Elias s original synthesis of sociology and psychology is examined through an analysis of several key texts including *The Civilizing Process* *The Established and the Outsiders* and *The Germans* Fletcher shows how Elias constructs his figurational models and applies these comparatively to specific historical examples drawn from England and Germany *Violence and Civilization* is an excellent introduction to Elias s work It will appeal to students of sociology anthropology and history interested in understanding the phenomenon of violence in the modern world

Lordship and Liberation in Palestine-Israel Muhannad Ayyash,2025-07-22 This interdisciplinary book provides timely fresh perspective on Palestine Israel by rethinking the nature of settler colonial sovereignty and the relationship between land and people Muhannad Ayyash argues that this relationship comes in two distinct forms a settler colonial type practiced by the Israeli state that consists of lordship over land and people and a decolonial type seen in Palestinian popular organizing

that he calls land as life a reciprocal bond The former is characterized by private ownership possession and violent expulsion of others the latter by communal ownership belonging to the land and opposition to the violence of expulsion Ranging widely across theory and history Ayyash contends that the opposition between these two types is at the core of the Palestinian Israeli struggle The choice before us today he concludes is between the continuation of the Israeli settler colonial project in particular and the project of colonial modernity in general or the commencement of a decolonial age in Palestine Israel and beyond Offering both novel theorizations and politically engaged analysis Lordship and Liberation in Palestine Israel illuminates how decolonial sovereignties represent an alternative to settler colonial violence

Norbert Elias and Human Interdependencies Thomas Salumets, 2001-08-27 While the opposing paradigms of globalization and fragmentation compete in often bloody and destructive ways in the world today this book convincingly reminds us of the importance of finding out more about the complex and changing ways in which we are connected The authors demonstrate that the more we understand our connectedness and deal with its consequences the less dependent and helpless we become The critical multidisciplinary perspectives they offer cover a wide range of subjects from the world wide web to medieval poetry nations and gender cancer narratives and money emotion management and the financial markets and the American civilizing process and the repression of shame The contributions bear witness to Elias s innovative achievements while the authors continue his stunning explorations extending them into other areas of the humanities and the sciences and presenting their own wide ranging and penetrating insights into our mutual dependence Contributors are Jorge Ardití SUNY Buffalo Godfried Van Benthem Van Den Bergh emeritus Erasmus University Rotterdam Reinhard Blomert Humboldt University Germany and Karl Franzens University Austria Stephen Guy Bray University of Calgary Thomas M Kemple University of British Columbia Hermann Korte emeritus University of Hamburg Germany Helmut Kuzmics University of Graz Austria Stephen Mennell National University of Ireland Thomas Salumets Thomas J Scheff emeritus University of California in Santa Barbara Ulrich C Teucher University of British Columbia Annette Treibel Pedagogical University of Karlsruhe and Cas Wouters Utrecht University Netherlands

The American Civilizing Process Stephen Mennell, 2013-04-24 Since 9 11 the American government has presumed to speak and act in the name of civilization But isthat how the rest of the world sees it And if not why not Stephen Mennell leads up to such contemporary questions through a careful study of the whole span of American development from the first settlers to the American Empire He takes a novel approach analysing the USA s experience in the light of Norbert Elias s theory of civilizing and decivilizing processes Drawing comparisons between the USA and other countries of the world the topics discussed include American manners and lifestyles Violence in American society The impact

of markets on American social character American expansion from the frontier to empire The curse of the American Dream and increasing inequality The religiosity of American life Mennell shows how the long term experience of Americans has been of growing more and more powerful in relation to their neighbours This has had all pervasive effects on the way they see themselves their perception of the rest of the world and how the rest of the world sees them Mennell s compelling and provocative account will appeal to anyone concerned about America s role in the world today including students and scholars of American politics and society The Collected Works of Norbert Elias: On the process of civilisation : sociogenetic and psychogenetic investigations. time in human history But what do top historians think about Pinker's reading of the past Does his argument stand up to historical analysis In *The Darker Angels of our Nature* seventeen scholars of international stature evaluate Pinker's arguments and find them lacking Studying the history of violence from Japan and Russia to Native America Medieval England and the Imperial Middle East these scholars debunk the myth of non violent modernity Asserting that the real story of human violence is richer more interesting and incomparably more complex than Pinker's sweeping simplified narrative this book tests and bests fake history with expert knowledge

Genesis of modern genocide Matthias Quent,2009-03-24 Essay from the year 2008 in the subject Sociology Law and Delinquency grade 1 0 University of Leicester language English abstract The phrase that the civilized Western World has to defend its values even by using physical violence is often mentioned by politicians and media makers Especially the war on terror draws a picture of the necessity of the West's force against the barbarism which seems to menace the civilized order In fact that seems to be a contradiction in terms How can underdeveloped uncivilized and uneducated people be able to menace the countries with the world most developed technologies and the highest standard of civilization as it is often said Norbert Elias presents a theory of the civilizing process which includes the opinion that a lot of things which a member of the present day Western civilized society esteems uncivilized in other societies today can be found in past epochs of his own society like the medieval feudal period The key question to understand on the one hand the civilizing process itself and the problem of the so called breakdown of civilization even in modern states on the other hand is how the civilizing of the West actually did happen

Does War Make States? Lars Bo Kaspersen, Jeppe Strandsbjerg,2017-03-02 Arising from renewed engagement with Charles Tilly's canonical work on the relationship between war and state formation this volume situates Tilly's work in a broader theoretical landscape and brings it into contemporary debates on state formation theory Starting with Tilly's famous dictum war made the state and the state made war the book takes his claim further examining it from a philosophical theoretical and conceptual view and asking whether it is applicable to non European regions such as the Middle East South America and China The authors question Tilly's narrow view of the causal relationship between warfare and state making and use a positive yet critical approach to suggest alternative ways to explain how the state is formed Readers will gain a comprehensive view of the most recent developments in the literature on state formation as well as a more nuanced view of Charles Tilly's work

Un-Civilizing Processes? ,2016-08-29 The collapse of the supposedly civilized German nation into the barbarism of Hitler's Third Reich has cast a long shadow over interpretations of German culture and society In the remarkable work of Norbert Elias himself a refugee from Nazi Germany a deep concern with the distinctiveness of the Germans is linked with an ambitious attempt to work out more general relations between broad historical processes patterns

of state formation changing social structures and the character of the individual self as evidenced in changing thresholds of shame and embarrassment In critical engagement with Elias s notion of the civilizing process the essays collected here explore moments of excess and transgression moments when the very boundaries of civilization are both constructed and challenged Inter disciplinary contributions on topics ranging from medieval laughter cursing and swearing through to music the bourgeois self and aspects of modern violence highlight the complexity of inter relations between the individual imagination and creativity on the one hand and the brute facts of political power and social structural inequalities on the other and develop new insights into the changing patterns of culture and society in Germany from the Middle Ages to the present
