and update of wireless principles and techniques Information about the latest and forthcoming RF and wireless circuits products and systems Guidelines approaches and techniques to RF wireless design Examples of typical applications with an emphasis on real world situations including existing and forthcoming new components and integrated circuits Coverage of new and emerging wireless topics heretofore not widely covered in print e g UWB RFID IR etc A comprehensive survey of current RF and wireless engineering practice Heavy emphasis on practical applications and design guidelines Multiple contributors assure a wide range of perspectives and avoids individual bias

Sharing RF Spectrum with Commodity Wireless Technologies Jan Kruys, Luke Qian, 2011-08-09 Much energy has been spent on the subject of spectrum scarcity that would threaten to stunt the growth of wireless technologies and services This concern comes on the heels of the great successes of both cellular communications and consumer oriented communications like Wi Fi and Bluetooth that have changed the way people use computers and communications and that have led to the creation of large new markets for products and services The response of many spectrum regulators throughout the world in addressing these concerns has been to consider releasing more spectrum for unlicensed or for shared use An example is the spectrum that is released by the transition to digital TV the frequencies freed up are destined in part to new applications that would be license exempt A possible beneficiary of new spectrum releases would be the smart grid a networked application of digital sensor and control technology to the energy delivery segment of the energy utility industry This policy has heightened the interests of all involved in spectrum sharing and many proposals are being considered or brought forward However theory in this area is scarce and practice proves resistive of quick solutions A case in point is RLAN radar spectrum sharing in the 5GHz range six years after the ITU R allocated this shared spectrum the rules for sharing as well as the means to verify compliance with these rules are not fully mature Another recent development is the interest in spectrum pricing and trading which tend to focus on the economic aspects of spectrum sharing at the expense understanding of the limitations as well as the technical possibilities of spectrum sharing
