Higher Education: A Critical Business Ronald Barnett,1997-06-16 Higher Education A Critical Business is a bold statement about higher education in the modern age It continues Ronald Barnett s thinking of his earlier books but offers a completely new set of ideas in a challenging but engaging argument A defining concept of the Western university is that of critical thinking but that idea is completely inadequate for the changing and unknowable world facing graduates Instead we have to displace the idea of critical thinking with the much broader idea of critical being In this idea students reflect critically on knowledge but they also develop their powers of critical self reflection and critical action This critique is transformative An education for critical being calls for a new approach to the process of higher education It also has implications for the organization and management of universities and for the relationship of universities to the wider worlds of work professionalism and intellectual life Barnett reviews what the academy customarily means when it talks about critical thought explains why that talk is so often shallow and pessimistic and holds up for contemplation a positive conception of a very wide self formed through education He breathes completely new life into the dead notion of academic as intellectual Professor Sheldon Rothblatt University of California Berkeley and Royal Institute of Technology Sweden Anyone interested in understanding how we might develop universities and higher education for the modern world should read this important book **CT1-PQ-12 Question and Answer Bank** ,2012 California.
