Global Crisis, Local Voices Gabriele Piazza, Megan Jessie Asplin, Kajsja Hallberg, 2019-04-01 In an interconnected and globalized world the voices of the local communities struggle to make themselves heard on the international stage. But many issues that arise within international relations have consequences for ordinary lives and are therefore closely connected. Climate change, warfare and migration are all examples of this. They are often discussed in abstract terms with relation to international diplomacy but threaten the actual livelihoods of small communities and ordinary people. This was the setting of the conference *Global Crisis Local Voices* held in May 2018. This journal is a compilation of the papers presented at that conference which was the second DEN International Student Conference. The conference and this publication is one of the many projects that the Democratic Education Network DEN is responsible for since its launch in 2016. This book is a collection of diverse works all written by student authors from a range of different universities. From Democracy and Ideology to Climate Change and China it covers numerous concepts, ideas and geographical regions that are often found in the studies of Politics and International Relations. This book is the result of passion and hard work from all students involved in its production and it is a project that we in DEN are incredibly proud of and hope to continue in the future. I encourage you to read these publications to catalyse views in you that stimulate great debate that helps you become part of the compassionate, progressive and responsible movement of young people that will help overcome injustices in the world and make the world a better place. Dr Peter Bonfield, OBE, FEng, Vice Chancellor and President, University of Westminster.

Research on Teaching Strategies and Skills in Different Educational Stages Pedro Gil-Madrona, Linda Saraiva, Luisa Losada-Puente, 2025-03-19 The teaching practice becomes a reciprocal activity in the classroom when teachers apply their creativity and their knowledge resulting from research and scientific evidence in the didactic teaching process with the purpose of strengthening in the students the key competencies of their training, turning students at the core of the didactic process. Teaching strategies must be articulated from previous research and planning and designed sequentially to promote real and interesting learning scenarios and thereby achieve significant learning. From this perspective of teaching learning strategies, the reciprocal interaction between the student and the teacher becomes the focus of attention with a playful, motivating, interesting and rewarding approach for the learner. The role of the teacher is conceived as fundamental in the teaching process to achieve the link between teaching, learning and evaluation strategies. For this reason, multidisciplinary studies are welcome from all stages of the educational system with quantitative, qualitative and mixed approaches and reviews promoting good teaching practices of reflection and innovation from these studies.

Blue Economy and Ocean Sustainable Development in a Globalised World: Social, Political, Economic and Environmental Issues Ibukun J. Adewumi, Andrei Polejack, Joanna Vince, Maree E. Fudge, 2023-12-05 In the last decade the concept of a Blue Economy has ignited a deep theoretical debate. Ranging from the integration of the triple bottom line of sustainability to the optimization of

profit from ocean exploitation the meaning of the term blue economy differs considerably between epistemic communities and even more so among national and regional policies There is a general sense of the opportunity to realise enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy Blue economy is gaining traction already as a significant component of national policies even in spite of a clear conceptualization of the term Many countries are now preparing national policies towards realising their blue economy ambitions utilizing the concept as they see fit Likewise multilateral and regional organisations are developing guidelines and providing investment in new research technologies and financing tools that promote blue economy Critical challenges abound in particular in less privileged countries These include the gap in research capabilities governments prioritizing social wellbeing and economic profit in contrast to environmental protection the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment *Books in Print*, 1987 **Haines San Francisco City & Suburban Criss-cross Directory**, 2007
