Geren, 2016-02-22 No other resource not even the building code presents the exact code information you need when you need it at design stage The International Building Code IBC is a model building code developed by the International Code Council ICC The IBC and its complementary codes provide design and construction professionals with a complete set of comprehensive coordinated building safety and fire prevention regulations in order to safeguard the public health and general welfare of the occupants of new and existing buildings and structures Adopted throughout most of the United States and its territories it is referenced by federal agencies such as the General Services Administration National Park Service Department of State U S Forest Service and the Department of Defense For architects and other design and construction professionals it is particularly important that they understand how to apply the IBC and how code officials view
