

THE NEW HISTORY OF PSYCHOLOGY: A Review and Critique

Benjamin J. Lovett
Syracuse University

In the past 30 years, the “new history of psychology” and its adherents have advocated a critical approach to scholarship, increased use of primary sources, a focus on sociopolitical forces, and the active inclusion of psychologists from underrepresented groups. This article argues that many scholars exaggerate the differences between old and new history of psychology, and that where the differences are indeed large, those discrepancies reveal certain limitations unique to the new history approach. These limitations, presented in the form of 5 questions posed to new historians, lead to a discussion of professional issues in the history of psychology.

In his preface to *The Great Psychologists*, Watson (1963, p. vii) wrote that “great men in psychology live on in the work for which they are an inspiration in the field. . . Their lives, occupations, motives, families. . . must be considered if we are to understand them.” Sentiments like these made Watson’s textbook a best-seller, as far as history of psychology books go, and they also made Watson the honorary father of a movement that led to professional associations and peer-reviewed journals focusing on the history of psychology. But both the terms and the reverent tone of that passage would be difficult to find in the contemporary history of psychology literature; even the use of “great” in the book’s title might be called into question.

This is partly attributable to the “new history” approach in the history of psychology. New historians argue that traditional history of psychology is too celebratory and ceremonial and that it is designed to search for lessons for present-day psychologists, to socialize students into the culture of academic psychology, and to look for antecedents to present-day research in order to bolster the claim that psychology’s story is that of a constantly progressing science. The new history approach has been explicated in several cogent papers, but no published critique of this style exists. Rather, it seems to have been accepted somewhat uncritically by professional historians and textbook writers.

This article has three goals. First, I briefly review the old and new histories, focusing on representative examples of each. Specifically, claims made by new historians about the old histories are judged against relevant documents. Second, I suggest some limitations of the new history of psychology by posing several
