

Bob Burton Pyraminx Method

This is the method I invented to solve the Pyraminx. It is extremely basic and doesn't require any algorithms. If you can solve the first layer of a 3x3x3 Rubik's Cube, you can solve a Pyraminx using this method without learning anything new. Even though this method is so simple, it is still good enough to achieve times of around 20 seconds on average and only about 30 seconds in the worst case scenario.

The Method

Step 1 - Solving the Tips

The first step is to solve the trivial tips. Each of the four tips can be solved by just rotating them to match their adjacent pieces.

Step 2 - Solving the Vertices

To solve the vertices, just look at any tip. Since there are four colors on the Pyraminx and only three colors on each tip, the color missing from that tip will be the opposite face of that tip. Therefore, orient the other three vertices so that they are opposite the tip you chose.

Step 3 - Solving the First Layer Edges

To solve the first layer edges, just insert them using three moves. This is similar to how you would insert a corner into the first layer of a 3x3x3 Rubik's Cube. The "algorithms" for this step are listed below.

Step 4 - Solving the Other Layers

If after Step 3 the puzzle is not solved, just rotate so that a different color is on the top face. Orient the final vertex of that color if it is not oriented already and solve the edges. One edge will already be solved from the layer you just completed in the previous step. If after solving that color layer the puzzle is not solved, choose yet a different color and repeat. You may have to go through all four colors to do this, but eventually the puzzle will be solved. Just be careful to only insert edges using the "algorithms" outlined below. Also make sure that you choose a different color each time you solve a new layer.
