**Copyright and Anonymity in the Creative User-Generated World** Rachel Maguire,2025-05-01 Explores the relationship between copyright law online anonymity and creative user generated content [The Non-Obvious Guide to Using AI for Marketing](#) David Berkowitz,2025-03-11 The Non Obvious Guide to AI Marketing offers hands on guidance for marketing professionals eager to harness the transformative power of AI Moving beyond technical jargon it focuses on actionable insights and practical strategies that enhance marketing efforts Readers will learn to implement AI to improve efficiency drive higher sales and achieve competitive advantage This essential guide is packed with real world examples and expert insights ensuring readers can apply AI effectively in their marketing practices to maximize ROI and stay ahead in the digital marketplace *Artificial Intelligence and Work* John Bratton,Laura Steele,2024-12-04 In an era marked by insecurity from neoliberalism financial volatility political instability regional conflicts pandemics and the climate crisis Artificial Intelligence AI is revolutionizing our work organizations societies and the environment This critical text explores who truly benefits from AI s development and deployment offering a comprehensive overview of AI s nature history and applications It delves into crucial themes such as the future of work digitalization neoliberalism s impact power dynamics ethics inequality gender race intersectional discrimination and environmental sustainability Unlike practical machine learning guides this book examines how AI and AI based technologies are transforming work highlighting both benefits and potential harms Combining critical management and leadership studies with organizational sociology it addresses societal implications inequality ethics and power often overlooked by other textbooks John Bratton s lucid and engaging writing style brings a cutting edge subject to life blending breadth critical analysis and academic rigor Contemporary examples illustrate AI s real life implications for organizations and work today while thought provoking questions encourage readers to engage with and reflect on the topics throughout Authored by John Bratton an Honorary Professor at Queen s University Belfast and Laura Steele a Senior Lecturer in Business and Society at Queen s University Belfast this interdisciplinary text is essential for students studying contemporary and emerging issues in business and management including AI business analytics digitalization and the future of work It is also recommended for courses on the sociology of work ethics organization studies management leadership and HRM This book is poised to become an essential textbook for courses on AI digitalization and the future of work making it a valuable resource for students and educators alike **OpenClaw for Beginners: The Step-by-Step Guide to Building AI Agents That Actually Work (No Coding Required)** Elian Ward,2026-03-18 You ve probably noticed something frustrating about AI chatbots They re great at conversations terrible at follow through You ask for help organizing your inbox and it writes you a nice plan Then nothing happens You still have 847 unread emails The AI just sits there waiting for you to do the actual work That s because chatbots can only talk They can t touch your computer They can t send emails update spreadsheets or check your calendar at 6am every morning They re consultants not employees

OpenClaw is different It s an AI that runs on your machine and actually does things People are using it to automate their entire morning routine handle customer support while they sleep and build products they sell for real money One guy made 62 000 in three weeks Another builds a dozen apps every single day But here s the problem most people think this is only for programmers They see words like GitHub and terminal and assume it s not for them Meanwhile complete beginners are setting this up in an afternoon and running businesses from their phones You probably have questions Can I really build an AI assistant without knowing how to code How do I make sure it doesn t do something stupid while I m sleeping What can this actually do that s worth the effort This book answers all of them It s written for people who don t have a technical background but want the unfair advantage that comes from having an AI working for you around the clock What you ll learn

- 1 How to set up OpenClaw safely so you don t accidentally give it access to things it shouldn t touch The security chapter comes first for a reason
- 2 Your first automation in under 30 minutes A simple morning briefing that delivers weather your schedule and your top tasks to your phone before you re even awake
- 3 How to use the Skills marketplace without installing something sketchy There are 1 700 pre built automations you can add to your agent Some are gold Some are garbage You ll learn to tell the difference
- 4 Real examples of people making money with this Not vague possibilities but actual businesses content creation systems client automation product development pipelines With the exact prompts they used
- 5 The architecture for running multiple agents One handles your clients Another does research A third manages your content All controlled from WhatsApp or Telegram
- 6 200 prompts you can copy and paste Everything from summarize my unread emails from important people to monitor competitor pricing and alert me to changes to turn my meeting notes into tasks automatically
- 7 Fifteen specific ways people are using OpenClaw to make money Not theories Working business models with real numbers attached

This book is for

- 1 People running their own business who need to scale without hiring
- 2 Freelancers who want their work happening even when they re not working
- 3 Anyone creating content who s tired of doing the same research tasks over and over
- 4 Professionals buried under emails and meetings who need those hours back
- 5 People who tried ChatGPT and thought this would be amazing if it could actually DO things

It s not a history of AI It s not explaining what machine learning is or how neural networks function It assumes you don t care about the theory and just want the thing working It s also honest about the risks OpenClaw is powerful which means it can cause real problems if you set it up wrong Chapter 2 exists to make sure you don t learn that lesson the expensive way The truth most people miss Most people will read about OpenClaw think it sounds cool and do nothing A small group will actually set it up An even smaller group will use it to build something that makes money or saves them serious time The difference isn t technical skill It s whether you re willing to spend an afternoon learning something new that could change how you work forever If you re ready to stop doing repetitive tasks yourself and start having an AI handle them this guide shows you exactly how
