Building Health Sciences Library Collections
Megan Inman,Marlena Rose,2023-07-03 Selected as a 2025 Doody's Core Title Collection development is a cornerstone of librarianship and with the rapid pace that library materials are produced a thorough knowledge of collection development is more important than ever before However with the myriad of choices available creating a meaningful collection can be a daunting task Building and maintaining a health sciences library collection can be a challenge especially in scenarios where there is no dedicated collection services department or collection development librarian Often in library school curriculum collection development strategies are discussed but specific examples of bibliographic sources may not be covered in detail particularly for health sciences resources Many collection development books often discuss the creation of policies budgeting practices and usability This book is a comprehensive reference guide for those who will be creating and curating their library health sciences collections Moving beyond a traditional list of titles this guide will focus on several formats and areas It features specific bibliographic information for top resources for a variety of subject areas and in a variety of formats This book is designed for all librarians whether new or experienced Each chapter of this title does a deep dive into an area of health sciences library collection building as well as covering how to maintain a current collection This book is designed to provide readers with a resource to lean on in determining the best bets in providing their users with health sciences resources to support curriculum practice and other user needs Readers who are interested in gleaning techniques for maintaining their health sciences library collection will also benefit from this how to guide as it details the deselection process Every health sciences librarian no matter their experience can benefit from this reference guide

Diagnostic Procedures in Patients with Neck Masses
Jerzy Klijanienko,Beatrix Cochand-Priollet,Olivier Choussy,Wojciech Golusiński,2024-12-23 This book gathers the consensus recommendations on diagnostic procedures in patients with neck masses by the European Head and Neck Society European Federation of Cytology Societies European Society of Hybrid Imaging and International Melanoma Pathology Study Group Because of the variability of anatomical structures and the richness of histological tissues the diagnostic process for neck masses is often complex The diagnostic process depends on the habits of oncological centers the experience of specialists and particular standards In reality there is no international

recommendations which would allow to define the optimal and least invasive modalities for carrying out a rapid and accurate diagnosis Written by the most eminent specialists of different profiles and geographic areas who present and analyze different technical modalities the book combines the different points of view and defines the agreed upon optimal technique Each chapter is short informative well referenced and the main messages are placed in tables and boxes The book is addressed to oncologists radiologists nuclear physicians ENT surgeons surgical and cyto pathologists This work is under the patronage of the International Academy of Cytology IAC Advances in Surgical and Medical Specialties Raj

Bawa,2023-07-14 The pace and sophistication of advances in medicine in the past two decades have been truly breathtaking This has necessitated a growing need for comprehensive references that highlight the current issues in specific sectors of medicine Keeping this in mind each volume in the Current Issues in Medicine series is a stand alone text that provides a broad survey of various critical topics in a focused area of medicine all accomplished in a user friendly yet interconnected format However unlike other series on medicine or medical texts this series focuses on current trends perspectives and issues in medicine that are central to healthcare delivery in the 21st century Medical practitioners today continue to improve upon techniques and technologies to provide procedures for patients that are safer faster less invasive and more accurate a direct consequence of advances in technological breakthroughs from a variety of medical and engineering fields In order to render modern patient care it is imperative that surgeons and medical practitioners stay current with these latest advances in their respective specialties Given this backdrop the specific topics covered in this volume and the expertise of the contributing authors accurately reflect the rapidly evolving areas within surgical and medical specialties While recognising how expansive and multifaceted medicine is Advances in Surgical and Medical Specialties addresses crucial recent advances in surgical and medical specialties intergrating the knowledge and experience of experts from academia and practicing surgeons The multidisciplinary approach reflected here makes this volume a valuable reference resource for medical practitioners medical students nurses fellows residents undergraduate and graduate students educators venture capitalists policymakers and biomedical researchers A wide audience will benefit from having this volume on their bookshelf health care systems the pharmaceutical industry academia and government **Why Black People Die Sooner** Joseph L. Graves,

Jr.,2025-11-11 There is a persistent gap in life expectancy between Black people and their white counterparts in the United States It is a direct result of structural racism within American society and has nothing to do with genetic differences In past eras scientific racism sought to shift the blame to the supposed physical inferiority of people of African descent Even today medicine labors under false beliefs derived from nineteenth century racial thinking harming patients who are not of European descent Why Black People Die Sooner is a powerful and rigorous examination of the ways racism shapes health and disease Joseph L Graves Jr demonstrates that the medical profession still fails to grasp basic facts about race tracing how deep rooted falsehoods have perpetuated the disparity between Black and white lifespans He equips readers with the tools to

dispel the fallacies and errors of racialized medicine including an understanding of evolutionary biology and human biological variation Graves also debunks common misconceptions about race and health on topics such as high blood pressure sickle cell disease the microbiome infectious diseases and cancer Why Black People Die Sooner closes by offering a sweeping vision for dismantling medical racism from professional training to clinical practice through biomedical research Timely and bracing this book reveals why medicine keeps misunderstanding race and how we can make it change
