A.I. Artificial intelligence, introduction to the issues and current trends Pavel Bartoš,2023-01-01 Artificial Intelligence AI often referred to by the acronym Artificial Intelligence is a fascinating and dynamically developing field that has far reaching implications for various sectors of human activity At its core it is the simulation of human intelligence in computer systems AI is capable of learning planning problem solving speech recognition visual perception and many other cognitive functions that were previously considered the exclusive domain of human thought **Hands-On Artificial Intelligence on Amazon Web Services** Subhashini Tripuraneni,Charles Song,2019-10-04 Perform cloud based machine learning and deep learning using Amazon Web Services such as SageMaker Lex Comprehend Translate and Polly Key FeaturesExplore popular machine learning and deep learning services with their underlying algorithmsDiscover readily available artificial intelligence AI APIs on AWS like Vision and Language ServicesDesign robust architectures to enable experimentation extensibility and maintainability of AI appsBook Description From data wrangling through to translating text you can accomplish this and more with the artificial intelligence and machine learning services available on AWS With this book you ll work through hands on exercises and learn to use these services to solve real world problems You ll even design develop monitor and maintain machine and deep learning models on AWS The book starts with an introduction to AI and its applications in different industries along with an overview of AWS artificial intelligence and machine learning services You ll then get to grips with detecting and translating text with Amazon Rekognition and Amazon Translate The book will assist you in performing speech to text with Amazon Transcribe and Amazon Polly Later you ll discover the use of Amazon Comprehend for extracting information from text and Amazon Lex for building voice chatbots You will also understand the key capabilities of Amazon SageMaker such as wrangling big data discovering topics in text collections and classifying images Finally you ll cover sales forecasting with deep learning and autoregression before exploring the importance of a feedback loop in machine learning By the end of this book you will have the skills you need to implement AI in AWS through hands on exercises that cover all aspects of the ML model life cycle What you will learnGain useful insights into different machine and deep learning modelsBuild and deploy robust deep learning systems to productionTrain machine and deep learning models with diverse infrastructure specificationsScale AI apps without dealing with the complexity of managing the underlying infrastructureMonitor and Manage AI experiments efficientlyCreate AI apps using AWS pre trained AI servicesWho this book is for This book is for data scientists machine learning developers deep learning researchers and artificial intelligence enthusiasts who want to harness the power of AWS to implement powerful artificial intelligence solutions A basic understanding of machine learning concepts is expected HCI International 2020 - Late Breaking Posters Constantine Stephanidis,Margherita Antona,Stavroula Ntoa,2020-11-07 This book constitutes the extended abstracts of the posters presented during the 22nd International Conference on Human Computer Interaction HCII 2020 which was held in July 2020

The conference was planned to take place in Copenhagen Denmark but had to change to a virtual conference mode due to the COVID 19 pandemic From a total of 6326 submissions a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place In addition a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work papers and posters These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems The 82 papers presented in this volume are organized in topical sections as follows design for all and assistive technologies virtual augmented and mixed reality learning HCI culture and art health and wellbeing applications HCI in mobility automotive and aviation

Law, Death, and Robots Keri Grieman, 2024-10-17 Can the law keep up with AI This book examines liability and regulation for artificial intelligence causing serious physical harm both now and in the future While AI moves quickly regulation follows more slowly an increasing problem for an evolutionary fast paced emerging technology AI has the potential to save lives but in doing so will have the potential to take them as well How do we future proof law and regulation to incentivise life saving innovation as safely as possible This book details how to regulate AI in high risk civil applications for example automated vehicles and medicine addressing both liability and regulatory structure It highlights crucial liability themes for technology governance provides tools to bridge the gap between regulators and technologists examines jurisdictional approaches to AI regulation in the EU UK USA and Singapore and ultimately suggests a jurisdiction agnostic blueprint for regulation

High Performance Computing in Clouds Edson Borin, Lúcia Maria A. Drummond, Jean-Luc Gaudiot, Alba Melo, Maicon Melo Alves, Philippe Olivier Alexandre Navaux, 2023-07-05 This book brings a thorough explanation on the path needed to use cloud computing technologies to run High Performance Computing HPC applications Besides presenting the motivation behind moving HPC applications to the cloud it covers both essential and advanced issues on this topic such as deploying HPC applications and infrastructures designing cloud friendly HPC applications and optimizing a provisioned cloud infrastructure to run this family of applications Additionally this book also describes the best practices to maintain and keep running HPC applications in the cloud by employing fault tolerance techniques and avoiding resource wastage To give practical meaning to topics covered in this book it brings some case studies where HPC applications used in relevant scientific areas like Bioinformatics and Oil and Gas industry were moved to the cloud Moreover it also discusses how to train deep learning models in the cloud elucidating the key components and aspects necessary to train these models via different types of services offered by cloud providers Despite the vast bibliography about cloud computing and HPC to the best of our knowledge no existing manuscript has comprehensively covered these topics and discussed the steps methods and strategies to execute HPC applications in clouds Therefore we believe this title is useful for IT professionals and students and researchers interested in cutting edge technologies concepts and insights focusing on the use of cloud technologies to run HPC applications

Artificial

Intelligence in Music and Audio Production Thomas Foster, 2025-04-07 In a time when artificial intelligence AI is becoming increasingly integrated into music production Artificial Intelligence in Music and Audio Production provides a comprehensive and easy to understand overview of the latest developments Artificial Intelligence in Music and Audio Production begins by explaining how AI is already being used in various areas of music production today from composition and sound design to mixing mastering and creating music videos Practical guides and examples show how anyone can benefit from these new technologies Whether it s about generating synthetic vocals transforming your own voice or creating complete songs using text prompts the possibilities are almost limitless Artificial Intelligence in Music and Audio Production demonstrates to musicians and producers how AI can allow musicians and producers to realize their ideas faster and in more comprehensive ways ultimately enriching their creative process This book will be of interest to singers DJs music producers and anyone interested in the future of music even without a deep technical background **L'intelligence artificielle pour tous**

Artificial Intelligence in Geography Stan Openshaw, Christine Openshaw, 1997-07-07 This unique work introduces the
basic principles of artificial intelligence with applications in geographical teaching and research GIS and planning Written in
an accessible non technical and witty style this book marks the beginning of the AI revolution in geography with major
implications for teaching and research The authors provide an easy to understand basic introduction to AI relevant to
geography There are no special mathematical and statistical skills needed indeed these might well be a hindrance AI is a
different way of looking at the world and it requires a willingness to experiment and readers who are unhindered by the
baggage of obsolete technologies and outmoded philosophies of science will probably do best The text provides an
introduction to expert systems neural nets genetic algorithms smart systems and artificial life and shows how they are likely
to transform geographical enquiry A major methodological milestone in geography The first geographical book on artificial
intelligence AI No need for previous mathematical or statistical skills knowledge Accessible style makes a difficult subject
available to a wide audience Stan Openshaw is one of the world's leading researchers into geographical computing spatial
