**Fund Math** Gideon Fairchild,AI,2025-02-27 Fund Math offers a practical guide to mastering financial mathematics essential for sound economic decision making The book emphasizes that understanding financial ratios capital

allocation and business investment calculations is crucial for value creation. It uniquely bridges the gap between theoretical concepts and real world applications, empowering readers to make informed decisions. Did you know that concepts like Net Present Value (NPV) and Internal Rate of Return (IRR) are key tools for evaluating investment opportunities? The book highlights how dividend policies and share repurchase programs impact shareholder value. The book progresses from basic financial ratios to advanced topics like discounted cash flow (DCF) analysis. It uses real world case studies, contemporary data, and spreadsheet modeling to demonstrate calculations. For instance, understanding a company's cash flow is as vital as understanding its profit, akin to knowing how much water is actually in a bucket versus how much it should hold. Fund Math also connects to accounting, corporate strategy, and risk management, providing a holistic view of financial decision making.

*Start with What Works* by Andy Bass, 2021-05-01. Start with What Works helps you to create new growth opportunities using the resources you already have at hand. It sounds obvious but frequently managers discount the value of their familiar resources and instead they look outside for something new. This can demotivate employees and be costly in terms of money and time. It's often a lot quicker, cheaper, and safer to see your existing resources with fresh eyes. This book shows you how to recognise overlooked potential in existing resources and how to flip the right switches to activate that potential. Covering ten lessons you can use for a variety of situations, each will feature a case study and a new mindset to adopt. With practical tools and templates, each will trigger fruitful discussions and insights for your organisation. You'll learn how to apply them to the situations you face so that you can identify new opportunities and turn those opportunities into action.
