*Principles of International Energy Transition Law* Frédéric Gilles Sourgens, Leonardo Sempertegui, 2023 Principles of International Energy Transition Law provides a succinct treatment of the legal principles that govern the transition to green energy The book positions energy transition in a broader energy context and outlines the interactions between different legal disciplines giving direction on how they can be reconciled Europeanisation of Access to Justice in Environmental Matters Bojana Todorovic, Roberto Caranta, 2025-05-29 This book analyses the ways in which Article 9 of the Aarhus Convention enables environmental access to justice in the Balkans a region at the epicentre of extreme climate change events Adopting a law in context approach the chapters explore national cultures and driving forces shaping the implementation of Aarhus standards in Albania Croatia North Macedonia Romania Slovenia and Serbia paving the way for their comparative assessment The book combines EU law and the case law of the European Court of Human Rights with the bottom up Europeanisation brought about by rising environmental protests and the activism of civil society organisations in the region In doing so it explores the extent to which these Balkan countries comply with requirements stemming from Article 9 of the Aarhus Convention and whether despite national differences it is possible to talk about Europeanisation of access to justice in environmental matters The interdisciplinary approach and geographical scope of the book make it an important read for academics and practitioners as well as for the civil society sector and policy makers grappling with the normative and practical challenges around environmental access to justice both in and beyond Europe De Gruyter Handbook of Degrowth Lauren Eastwood, Kai Heron, 2024-03-04 Degrowth has emerged as one of the most exciting and contested fields of research into the drivers of global heating ecological collapse and economic injustice The perspective is both a critique of existing growth based models of development which it argues have put humanity on a collision course with non negotiable ecological limits and a vision for a brighter future in which humans and non humans alike can flourish By putting an end to growth seeking economic development and boundless energetic and material throughputs degrowth s proponents suggest we can build an economy that meets the material needs of people and planet for generations to come This handbook s contributions signal the importance of degrowth across multiple disciplines and practices Along the way they grapple with some of the most critical questions ideological assumptions policies and social struggles of our time The handbook approaches degrowth as a loosely knit and developing set of interdisciplinary propositions about what it might take to achieve a world of human and non human flourishing Contributors explore challenge and critique degrowth s propositions and its prospects of shaping scholarly agendas policy frameworks and social movements Essays consider degrowth from a variety of empirical and theoretical vantages including urban design architecture political economy political ecology critical geography and political theory This integrative approach at once critical and constructive aims to preserve for readers the sense of possibility that has drawn people to degrowth scholarship thus far Minerals Yearbook ,2013 **Indian**
