Sap Abap Springer:

SAP ABAP Sushil Markandeya, Kaushik Roy, 2014-11-17 *SAP ABAP Advanced Business Application Programming* offers a detailed tutorial on the numerous features of the core programming platform used for development for the entire SAP software suite. *SAP ABAP* uses hands on business oriented use cases and a valuable dedicated e resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. *SAP ABAP* covers the latest version NetWeaver 7.3 and SAP application programming release 6.0 of the platform for demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, *SAP ABAP* is a comprehensive practical one stop solution which demonstrates and conveys the language's commands and features through hands on examples. The accompanying e resource is a take off point to the book. *SAP ABAP* works in tandem with the accompanying e resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature command showing and discussing the corresponding code. At the reader's option the user can utilize the accompanying e resource where a step by step guide to creating and running the feature's object is available. The presentation of the features is scenario oriented i.e. most of the features are demonstrated in terms of small business scenarios. The e resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature command are conveyed through execution of these hands on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects including the programs rely on some of the SAP application tables being populated for example an IDES system which is now a de facto system for all SAP training related activities.

SAP ABAP Objects Rehan Zaidi, 2019-09-27 *Understand ABAP objects: the object oriented extension of the SAP language ABAP in the latest release of SAP NetWeaver 7.5 and its newest advancements*. This book begins with the programming of objects in general and the basics of the ABAP language that a developer needs to know to get started. The most important topics needed to perform daily support jobs and ensure successful projects are covered. *ABAP* is a vast community with developers working in a variety of functional areas. You will be able to apply the concepts in this book to your area. *SAP ABAP Objects* is goal directed rather than a collection of theoretical topics. It doesn't just touch on the surface of ABAP objects but goes in depth from building the basic foundation e.g. classes and objects created locally and globally to the intermediary areas e.g. ALV programming, method chaining, polymorphism, simple and nested interfaces and then finally into the advanced topics e.g. shared memory, persistent objects. You will know how to use best practices to make better programs via ABAP objects. What You'll Learn: Know the latest advancements in ABAP objects with the new SAP Netweaver system. Real Optimization with SAP® APO Josef Kallrath, Thomas I. Maindl, 2006-09-02 Optimization is a serious issue touching many aspects of our life and activity But it has not yet been completely absorbed in our culture In this book the authors point out how relatively young even the word model is On top of that the concept is rather elusive How to deal with a technology that nds applications in things as diverse as logistics robotics circuit layout financial deals and traffic control Although during the last decades we made significant progress the broad public remained largely unaware of that The days of John von Neumann with his vast halls full of people frantically working mechanical calculators are long gone Things that looked completely impossible in my youth like solving mixed integer problems are routine by now All that was not just

achieved by ever faster and cheaper computers but also by serious progress in mathematics. But even in a world that more and more understands that it cannot afford to waste resources, optimization remains to a large extent unknown. It is quite logical and also fortunate that SAP, the leading supplier of enterprise management systems, has embedded an optimizer in his software. The authors have very carefully investigated the capabilities and the limits of APO. Remember that optimization is still a work in progress. We do not have the tool that does everything for everybody.

Pro SAP Scripts, Smartforms, and Data Migration
Sushil Markandeya, 2017-12-01. Master SAP scripts, Smartforms, and data migration with hands-on exercises. The information provided in this book will help you decode the complexities and intricacies of SAP ABAP programming. Pro SAP Scripts, Smartforms, and Data Migration begins by describing the components of a SAP script form, styles, and standard texts. It then shows you how an ABAP program can invoke a SAP script form and send data to the form to provide output. You will then apply these concepts to hands-on exercises covering real business scenarios. These scenarios include creating a custom form from scratch to output purchase orders. Smartforms will then be introduced as an enhanced tool to output business documents. The book will show you how to apply the concepts of Smartforms to real-world problems. The data migration material includes details of the Legacy System Migration Workbench (LSMW). This is introduced as a platform from which every data migration task can be performed, minimizing or eliminating programming.

What You Will Learn: Create and deploy SAP script forms and related objects; Modify a copy of a SAP-supplied SAP script form, configure it, and deploy it according to transaction code ME22N; Build Smartforms forms and deploy them; Carry out data migration using the batch input and call transaction methods; Perform data migration using all four methods available in LSMW; Modify a copy of a SAP-supplied Smartforms form, configure it, and deploy it according to transaction code NACE.

Who This Book Is For: Readers new to SAP ABAP programming, close to three years of experience, or less, are the primary target audience for this book. Intermediate users can also utilize this book as a reference source.
