

The background of the cover features several stylized neurons. Each neuron has a central cell body (soma) and multiple branching processes (dendrites and axons) extending outwards. The cell bodies are rendered in a light blue or white color, while the axons are thin, light-colored lines. At the ends of many axons, there are small, glowing yellow-orange spots, representing synaptic terminals or action potentials. The neurons are scattered across the dark background, with some appearing more prominent than others. The overall effect is a scientific and artistic representation of neural activity.
