If Only Suomi Alun Buffry,2020 If Only Suomi is a story of love through time At first thought the difference between past present and future may seem obvious The past has happened the present is now and the future has yet to come Second by second our future becomes our past That is if time is linear and we travel in a straight line But what if we could travel in time your past can become your future or your future can become your past What if your future could become your past What sort of paradox could we create How careful would one have to be to avoid even wiping oneself out of time altogether What if you went back in time and fell in love then had to return to the present leaving your love behind What if you could travel back and change your past to change the present and your future or even to live your life a second time This is a story of how the future changed the past when Al from 2028 travels back to 1972 just for three days This is a science fiction story and a romance for Al falls in love in 1972 and then has to return to 2028 without his beloved Suomi Will they ever meet again Time can sometimes work wonders Most books are considered to be fiction or non fiction or a combination written before or after the events therein Those are either historical which can include a lot of speculation and guesswork simply made up futuristic speculative prophecies or wishful thinking This book is all of that It s questionable when exactly it was written It is clearly written after events in the author s life but both before and after the present day in 2020 on our calendars It includes memories and dreams prophecies and wishful thinking In fact some sort of time travel If only in the mind So what is the difference between dreams and memories We can have memories of dreams and dreams of memories We can have dreams within dreams What is the difference between reality and illusions or imagination Dreams can seem very real and what we normally call reality can often seem unreal Ancient religions tell us that the world is nothing but an illusion just at twinkle in the eye of the Creator a cutting from the fingernail of Krishna Maya All the world s a stage And all the men and women merely players wrote William Shakespeare As children we sang Row row row your boat Gently down the stream Merrily merrily merrily merrily Life is but a dream Modern day scientists may tell us that the whole Universe and everything around us even our own bodies is made of subatomic particles too small to see with the naked eye and waves that sometimes it may be a particle and sometimes a wave wave particle duality and according to the Heisenberg Uncertainty Principle we can never say exactly when and where a particle is They say that it is mostly space and that it is our senses and brains that put it all together so we can live in it In other words an illusion Others even say that technically it is all holographic We are not actually here at all And some religious folk who believe in an all powerful God may say that it was all made not so long ago to look like it is much older like a film set or a game of Dungeons and Dragons Then there are dreams within dreams
