Intelligent and Fuzzy Techniques: Smart and Innovative

Solutions Cengiz Kahraman, Sezi Cevik Onar, Basar Oztaysi, Irem Ucal Sari, Selcuk Cebi, A. Cagri Tolga, 2020-07-10 This book gathers the most recent developments in fuzzy machine learning risk assessment heuristics and clustering the book is a valuable resource for academics M Sc and Ph D students as well as managers and engineers in industry and the service sectors

Industry 4.0 Solutions for Building Design and Construction Farzad Pour Rahimian, Jack Steven Goulding, Sepehr Abrishami, Saleh Seyedzadeh, Faris Elghaish, 2021-12-20 This book provides in depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in Architecture Engineering and Construction AEC Scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of Industry 4 0 Mainstream Building Information Management BIM is seen as a vehicle for addressing issues such as industry fragmentation value driven solutions decision making client engagement and design process flow however advanced simulation computer vision Internet of Things IoT blockchain machine learning deep learning and linked data all provide immense opportunities for dealing with these challenges and can provide evidenced based innovative solutions not seen before These technologies are perceived as the true enablers of future practice but only recently has the AEC sector recognised terms such as golden key and golden thread as part of BIM processes and workflows This book builds on the success of a number of initiatives and projects by the authors which include seminal findings from the literature research and development and practice based solutions produced for industry It presents these findings through real projects and case studies developed by the authors and reports on how these technologies made a real world impact The chapters and cases in the book are developed around these overarching themes BIM and AEC Design and Optimisation Application of Artificial Intelligence in Design BIM and XR as Advanced Visualisation and Simulation Tools Design Informatics and Advancements in BIM Authoring Green Building Assessment Emerging Design Support Tools Computer Vision and Image Processing for Expediting Project Management and Operations Blockchain Big Data and IoT for Facilitated Project Management BIM Strategies and Leveraged Solutions This book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the AEC industry and is essential reading for all involved in the sector It is particularly suited for use in Masters level programs in Architecture Engineering and Construction

Enabling technologies and business models for energy communities Alessandro Burgio, Zbigniew M. Leonowicz, Michal Jasinski, 2026-03-06 Energy communities are a modern reorganization of local energy systems to integrate distributed energy resources a reorganization that plays a strategic role in helping people around the world in the transition process towards sustainable and renewable energies The benefits of citizens participating in these communities are manifold eg environmental sustainability greenhouse gas emission reduction exploitation of renewable energy resources awareness in action as global consumers increase in energy efficiency reduction own energy consumption and bill Implementing energy communities on a very large scale beyond mere good ideas

requires enabling technologies capable of solving technical and practical issues Many of these technologies already exist cloud platforms IoTs edge devices but may require an economic commitment that is probably not compatible with the real context of local energy communities often consisting mainly of residential users For this reason it is necessary to share as much as possible the most recent and advanced technological solutions scalable and at low cost along with best practices The expected submissions focus on the establishment of energy communities in both developed and emerging countries and in particular on the following current enabling hardware and software technologies eg peer to peer blockchain smart contract IoT digital twins real smart metering cloud platforms artificial intelligence machine learning humans in the loop e participation etc business models and financial risks public private agreements recent solutions for consumers engagement including social science approaches winning strategies and best practices Dr Alessandro Burgio is an employee of Evolvere SpA in Italy and declares no other competing interests [ITNG 2021 18th International Conference on Information Technology-New Generations](#) Shahram Latifi,2021-06-04 This volume represents the 18th International Conference on Information Technology New Generations ITNG 2021 ITNG is an annual event focusing on state of the art technologies pertaining to digital information and communications The applications of advanced information technology to such domains as astronomy biology education geosciences security and health care are the among topics of relevance to ITNG Visionary ideas theoretical and experimental results as well as prototypes designs and tools that help the information readily flow to the user are of special interest Machine Learning Robotics High Performance Computing and Innovative Methods of Computing are examples of related topics The conference features keynote speakers a best student award poster award service award a technical open panel and workshops exhibits from industry government and academia This publication is unique as it captures modern trends in IT with a balance of theoretical and experimental work Most other work focus either on theoretical or experimental but not both Accordingly we do not know of any competitive literature [Project Manager's Handbook](#) David L. Cleland,Lewis R. Ireland,2007-10-14 Market project managers construction managers business managers special projects managers and strategic planner Thirty percent of the book is drawn from international projects Covers non traditional industries such as health care educational systems media and entertainment and computers and communications *Performance-Based Earned Value* Paul Solomon,Ralph Young,2007 A complete toolkit for implementation of Earned Value Management Performance Based Earned Value uniquely shows project managers how to effectively integrate technical schedule and cost objectives by improving earned value management EVM practices Providing innovative guidelines methods examples and templates consistent with capability models and standards this book approaches EVM from a practical level with understandable techniques that are applicable to the management of any project Clear and unambiguous instructions explain how to incorporate EVM with key systems engineering software engineering and project management processes such as establishing the technical or quality baseline requirements management using product metrics and meeting success

criteria for technical reviews Detailed information is included on linking product requirements project work products the project plan and the Performance Measurement Baseline PMB as well as correlating technical performance measures TPM with EVM With straightforward instructions on how to use EVM on a simple project such as building a house and on complex projects such as high risk IT and engineering development projects it is the only book that includes excerpts from the PMI s Project Management Body of Knowledge PMBOK CMMI the EVM System standard systems engineering standards federal acquisition regulations and Department of Defense guides Performance Based Earned Value allows both novices and experienced project managers including project manager of suppliers and customers in the commercial and government sectors software and systems engineering process improvement leaders CMMI appraisers PMI members and IEEE Computer Society members to Incorporate product requirements and planned quality into the PMB Conduct an Integrated Baseline Review Analyze performance reports Perform independent assessments and predictive analysis Ensure that key TPMs are selected monitored and reported Identify the right success criteria for technical reviews Develop techniques for monitoring and controlling supplier performance Integrate risk management with EVM Comply with government acquisition policies and regulations Written by Paul Solomon and Ralph Young internationally recognized industry experts Performance Based Earned Value is constructed from guidance in standards and capability models for EVM systems engineering software engineering and project management It is the complete guide to EVM invaluable in helping students prepare for the PMI PMP exam with practical examples and templates to facilitate understanding and in guiding project professionals in the private and public sectors to use EVM on complex projects PMI PMBOK PMP and Project Management Professional are registered marks of the Project Management Institute Inc
