Charles Nehme, The unique HVAC requirements of supermarkets present a compelling blend of engineering challenges and opportunities. Supermarkets are dynamic environments with various zones that demand precise temperature, humidity, and ventilation control to ensure the comfort of shoppers, preserve perishable products, and meet stringent regulatory standards. Yet behind the scenes, these systems must be energy efficient, sustainable, and seamlessly integrated with refrigeration and automation technologies to control costs and minimize environmental impact. This book, *HVAC for Supermarkets: Design, Efficiency, and Operations*, is designed for HVAC professionals, supermarket facility managers, and engineers who seek to deepen their understanding of supermarket-specific HVAC design and management. Supermarkets, as complex and energy-intensive facilities, are at the forefront of this evolution. From the basic principles of HVAC design tailored to supermarkets through integration with refrigeration systems to the implementation of advanced controls and smart technologies, this book provides practical insights and guidelines for addressing both current challenges and future demands. Through a careful balance of theory, practical advice, and real-world case studies, readers will gain a clear roadmap to designing HVAC systems that not only meet the technical demands of supermarket environments but also contribute to broader sustainability goals.
