Meeus,2009 **Astronomy on the Personal Computer** Oliver Montenbruck,Thomas Pflieger,2009-03-23 A thorough introduction to the computation of celestial mechanics covering everything from astronomical and computational theory to the construction of rapid and accurate applications programs The book supplies the necessary knowledge and software solutions for determining and predicting positions of the Sun Moon planets minor planets and comets solar eclipses stellar occultations by the Moon phases of the Moon and much more This completely revised edition takes advantage of C and individual applications may be efficiently realized through the use of a powerful module library The accompanying CD ROM contains the complete fully documented and commented source codes as well as executable programs for Windows 98 2000 XP and LINUX **Easy PC Astronomy with Floppy Disk** Peter Duffett-Smith,1997 Allows anyone to make astronomical calculations easily and accurately ready to use on any IBM PC type computer **C Programming: The Essentials for Engineers and Scientists** David R. Brooks,1999-06-04 This text teaches the essentials of C programming concentrating on what readers need to know in order to produce stand alone programs and so solve typical scientific and engineering problems It is a learning by doing book with many examples and exercises and lays a foundation of scientific programming concepts and techniques that will prove valuable for those who might eventually move on to another language Written for undergraduates who are familiar with computers and typical applications but are new to programming *Artificial Intelligence and Evolutionary Computations in Engineering Systems* S. Chandramohan,Bala Venkatesh,Subhransu Sekhar Dash,Swagatam Das,C. Sharmeela,2021-08-18 This book gathers selected papers presented at the 6th International Conference on Artificial Intelligence and Evolutionary Computations in Engineering Systems held at the Anna University Chennai India from 20 to 22 April 2020 It covers advances and recent developments in various computational intelligence techniques with an emphasis on the design of communication systems In addition it shares valuable insights into advanced computational methodologies such as neural networks fuzzy systems evolutionary algorithms hybrid intelligent systems uncertain reasoning techniques and other machine learning methods and their application to decision making and problem solving in mobile and wireless communication networks

Eratosthenes and the Measurement of the Earth's Circumference (c.230 BC) Christopher A. Matthew,2023-06-05 Eratosthenes and the Measurement of the Earth s Circumference c 230 BC is an innovative and thought provoking examination of one of the pivotal moments in the history of science This text analyses a debate that has been going on for more than 2 300 years over the accuracy of Eratosthenes experiment and calculations and puts to rest all prior theories that have come before This work engages with this long running debate by applying innovative and multi disciplinary methods such as linguistic analysis mathematical modelling satellite mapping archaeological investigation and historical examination that creates the first ever combined exploration of this important event in the history of astronomy **On Western**

Influences and the Transformation of Chinese Academic Thought Qing Zhang,2025-12-18 This book analyses the growth of disciplinary knowledge in modern China through Sino foreign cultural exchange It examines Western influences and the transformation of Chinese academic thought through modern scientific disciplines rather than mere westernization based on the nationality of knowledge Historically this transformation is not the unidirectional eastward dissemination of Western learning but the introduction of West learning into China with more active participation and choice by Chinese scholars This understanding of the historical process focuses more on the innovation of the medium of knowledge emphasizing the material and technological background of the dissemination of Western learning
