

TEMPLATE FOR ACTION RESEARCH PROPOSAL

PARTS OF AN ACTION RESEARCH PROPOSAL	KEY POINTS TO CONSIDER IN WRITING AN ACTION RESEARCH PROPOSAL
TITLE OF ACTION RESEARCH	Integrate in the research title the primary purpose of the study and the intervention to use in addressing the problem.
I. INTRODUCTION	The original source of the problem is discussed in this portion. It is an explanation of the circumstances which prompted the researcher to pursue the study. Observed prevailing and existing conditions related to the problem should be clearly described to justify the choice of the study.
Statement of the Problem	The specific objectives of the action research are presented in question form. They are arranged logically and are introduced using a paragraph that contains the primary purpose of the study.
Hypothesis	It should be stated in a negative statement e.g. There is no significant difference in the Grade 7 students' level of performance in Math before and after the implementation of Math Plus.
II. BRIEF REVIEW OF RELATED LITERATURE AND STUDIES	<p>This part aims to present what has or has not been done on the problem being investigated. It establishes the baseline data about the problem through a review of related readings/studies.</p> <p>This part highlights the importance of the present study by presenting the similarities and differences of the information read to the variables of the present study. It provides a general picture of the research topic.</p> <p>The "Related Literature" is an article written by an expert on the topic being investigated. It may be those statements published in books, journals, periodicals or from electronic sources.</p> <p>Brief discussion of the intervention program and its basis should be completely discussed in this part of action research.</p> <p>The researcher can present what expert says about the topic and contrasts the same to what another person says about. Discussion of related readings should follow the sequence of the specific questions.</p> <p>Writing the related literature, the researchers should consider more updated references particularly when the discussion is focused on innovations and continuous improvement.</p> <p>Local literature should not be separated from foreign literature. "Author, Year" format should be followed in making citations e.g. (Merle, 2017).</p> <p>Materials lifted from electronic sources whose authors are unknown are not reliable. Hence, they should not be taken as reference for an action research.</p> <p>Only research findings and statements which are related in purpose, methods or findings to the present study should be included in the review. Clarify the interrelationships of the studies reviewed and the present study. Point weaknesses and strengths of each study reviewed.</p>
