Privacy and Data Protection based on the GDPR Leo Besemer, 2020-09-15 Information about people is becoming increasingly valuable Enabled by new technologies organizations collect and process personal data on a large scale Free flow of data across Europe is vital for the common market but it also presents a clear risk to the fundamental rights of individuals This issue was addressed by the Council of the European Union and the European Parliament with the introduction of the General Data Protection Regulation GDPR For many organizations processing personal data the GDPR came as a shock Not so much its publication in the spring of 2016 but rather the articles that appeared about it in professional journals and newspapers leading to protests and unrest The heavy requirements of the law would cause very expensive measures in companies and organizations was a concern In addition companies which failed to comply would face draconian fines This book is intended to explain where these requirements came from and to prove that the GDPR is not incomprehensible that the principles are indeed remarkably easy to understand It will help anyone in charge of or involved in the processing of personal data to take advantage of the innovative technologies in processing without being unduly hindered by the limitations of the GDPR The many examples and references to EDPB European Data Protection Board publications recent news articles and case law clarify the requirements of the law and make them accessible and understandable Leo's book can provide very effective support to you and your colleagues in reaching this understanding and applying it in practice Fintan Swanton Managing Director of Cygnus Consulting Ltd Ireland *Coherence between Data*

Protection and Competition Law in Digital Markets Klaudia Majcher, 2023-10-09 In digital markets data protection and competition law affect each other in diverse and intricate ways Their entanglement has triggered a global debate on how these two areas of law should interact to effectively address new harms and ensure that the digital economy flourishes Coherence between Data Protection and Competition Law in Digital Markets offers a blueprint for bridging the disconnect between data protection and competition law and ensuring a coherent approach towards their enforcement in digital markets Specifically this book focuses on the evolution of data protection and competition law their underlying rationale their key features and common objectives and provides a series of examples to demonstrate how the same empirical phenomena in digital markets pose a common challenge to protecting personal data and promoting market competitiveness A panoply of theoretical and empirical commonalities between these two fields of law as this volume shows are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail The ideas that Majcher puts forward for a more synergetic integration of data protection and competition law are anchored in the concept of sectional coherence This new coherence centred paradigm reimagines the interpretation and enforcement of data protection and competition law as mutually cognizant and reciprocal allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions This book reflects on the conceptual practical institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions
