*Tracking People* Anthea Hucklesby, Raymond Holt, 2023-08-30 Tracking technologies are now ubiquitous and are part of many people's everyday lives. Large sections of the population voluntarily use devices and apps to track fitness, medical conditions, sleep, vital signs, or their own or others' whereabouts. Governments, health services, immigration, and criminal justice agencies increasingly rely upon tracking technologies to monitor individuals' whereabouts, behaviour, medical conditions, and interventions. Despite the human rights concerns of some organisations and individuals, most wearers and their significant others tend to welcome the technologies. This paradox is only one of the many fascinating challenges raised by the widespread use of tracking technologies, which are explored in this book. This book critically explores the ethical, legal, social, and technical issues arising from the current and future use of tracking technologies. It provides a unique and wide-ranging discussion via a cross-disciplinary collection of essays on issues relating to technological devices and apps whose use is imposed upon wearers or suggested by others, whether agencies or individuals, including in the domains of criminal justice, terrorism, and health and social care. Contributions from leading academics from across social sciences, engineering, computer and data science, philosophy, and health and social care address the diverse uses of tracking technologies, including with individuals with dementia, defendants and offenders, individuals with mental health conditions, and drug users, alongside legal, ethical, and normative questions about the appropriate use of these technologies. Cross-disciplinary themes emerge, focusing on both the benefits of the technologies—freedom, improved safety, security, well-being, and autonomy, and increased capacity and efficiencies for public services—and the challenges: implementation and operational costs, mission creep, privacy concerns, stigmatisation, whether the technologies work as expected, and useability and wearability for all wearers. This book is essential reading for academics and students engaged in criminology, criminal justice, socio-legal studies, science and technology studies, medicine, health and social care, psychology, engineering, computer and data science, philosophy, social policy, and social work and security studies. It will also be of great interest to policy makers, regulators, practitioners already deploying or considering using tracking technologies, and to current and potential wearers. *Managing Global Innovation* Roman Boutellier, Oliver Gassmann, Maximilian von Zedtwitz, 2008-03-12 If R D and innovation in the 1990s were about more internationalization, more corporate entrepreneurship, and more information integration, then the 2000s have been about consolidating and expanding these trends further, more globalization, including the technology mavericks of China and India, more open and inbound innovation, integrating external technology providers, and more web and Internet enabling of innovation processes by involving R D contributors, regardless of their location. The corporate R D powerhouses of the 1980s are now mostly history. Even where they survived, they had to yield to corporate efficiency efforts and business-wide integration programs. Still, it would be unfair to belittle them in retrospect, as they have found new roles in corporate R D and innovation networks. In fact, the very successes of centralized R D organizations of the 1970s and 1980s made possible the revolution of

globalized innovation that we have been witnessing since the 1990s The first two editions of *Managing Global Innovation* published in 1999 and 2000 were testimonials of an increasingly internationalizing world of innovation and R D In this third edition of *Managing Global Innovation* we have retained the basic structure of two conceptual parts I and II and three case study parts III IV V However we have greatly revised all chapters including the final Imp cations chapter part VI and incorporated new chapters and cases that illuminate and describe the recent trends in the context of the beginnings of global innovation in the 1980s and 1990s

*QoE Management in Wireless Networks* Ying Wang, Wen'an Zhou, Ping Zhang, 2016-08-01. This SpringerBrief presents research results on QoE management schemes for mobile services including user services and resource allocation. Along with a review of the research literature, it offers a data-driven architecture for personalized QoE management in wireless networks. The primary focus is on introducing efficient personalized character extraction mechanisms, e.g., context-aware Bayesian graph model and cooperative QoE management mechanisms. Moreover, in order to demonstrate the effectiveness of the QoE model, a QoE measurement platform is described, and its collected data is examined. The brief concludes with a discussion of future research directions. The example mechanisms and the data-driven architecture provide useful insights into the designs of QoE management and motivate a new line of thinking for users' satisfaction in future wireless networks.

**Channel Characterization and Modeling for Vehicular Communications** Xiang Cheng, Ziwei Huang, Lu Bai, 2023-12-04. This book presents and develops comprehensive knowledge of vehicular channel characteristics and proper vehicular channel models. The studied topics contain the propagation characteristics of vehicular communications such as a time-frequency non-stationary single-input single-output (SISO) vehicle-to-vehicle (V2V) non-geometry stochastic model, NGSM (a space-time non-stationary massive multiple-input multiple-output (MIMO) V2V regular-shaped geometry-based stochastic model), RS-GBSM, and a space-time non-stationary massive MIMO V2V irregular-shaped geometry-based stochastic model, IS-GBSM. Each is introduced with characteristics then discussed in detail. Finally, this book discusses future research directions to inspire further investigation in the field of vehicular channels from three different perspectives.
