Science Education for the Future Norman Reid, Khaled Ahmed Al-Madani, Fatheya Mahmood Al-Ahmadi, 2025-04-01 This book draws on the wealth of worldwide research into science education to establish a set of key principles for teaching secondary science. It considers the aims of science education and the themes and topics that should be included in the curriculum and how these can be effectively taught and assessed in a variety of contexts. Offering a framework for the training and professional development of science teachers, the chapters answer key questions such as: How can I help my students to make sense of difficult areas in my subject? What is meant by understanding and how can I help my students achieve it? Is it possible to teach scientific thinking and how can I do it? What about learner attitudes when they are sometimes negative? What are the different ways to teach in the sciences that are effective? How can I make learning in the laboratory more efficient and effective? How can I employ assessment as a positive aid to learning? Including reflective questions, tasks, and diagrams, this is essential reading for all student and practising secondary science teachers.

Representations of Nature of Science in School Science Textbooks Christine McDonald, Fouad Abd-El-Khalick, 2017-04-21 Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provides a global perspective on NOS from elementary to college level and discusses the practical implications in various regions across the globe.
