Siddique, Hojjat Adeli, 2017-05-19. *Nature Inspired Computing: Physics and Chemistry Based Algorithms* provides a comprehensive introduction to the methodologies and algorithms in nature-inspired computing, with an emphasis on applications to real-life engineering problems. The research interest for Nature-inspired Computing has grown considerably, exploring different phenomena observed in nature and basic principles of physics, chemistry, and biology. The discipline has reached a mature stage, and the field has been well established. This endeavour is another attempt at investigation into various computational schemes inspired from nature, which are presented in this book with the development of a suitable framework and industrial applications. Designed for senior undergraduates, postgraduates, research students, and professionals, the book is written at a comprehensible level for students who have some basic knowledge of calculus and differential equations and some exposure to optimization theory. Due to the focus on search and optimization, the book is also appropriate for electrical, control, civil, industrial, and manufacturing engineering, business, and economics students, as well as those in computer and information sciences. With mathematical and programming references and applications in each chapter, the book is self-contained and can also serve as a reference for researchers and scientists in the fields of system science, natural computing, and optimization.

Applications of Firefly Algorithm and its Variants Nilanjan Dey, 2019-11-09. The book discusses advantages of the firefly algorithm over other well-known metaheuristic algorithms in various engineering studies. The book provides a brief outline of various application-oriented problem-solving methods, like economic emission load dispatch, problem designing a fully digital controlled reconfigurable switched beam nonconcentric ring array antenna, image segmentation, span minimization in permutation flow shop scheduling, multi-objective load dispatch problems, image compression, etc., using FA and its variants. It also covers the use of the firefly algorithm to select features, as research has shown that the firefly algorithm generates precise and optimal results in terms of time and optimality. In addition, the book also explores the potential of the firefly algorithm to provide a solution to traveling salesman problem, graph coloring problem, etc.
