subjects more or less beneath their notice and by others as deleterious to the human race and therefore to be cautiously used or scrupulously avoided Another peculiarity is that the more we are accustomed to them the more our interest wanes and probably at last degenerates into apathetic indifference We can only attribute these ignorant conceits and apparently unaccountable obliquity of judgment to two causes an assumption of wisdom and an unenlightened mind unwilling to learn and loath to improve Another hindrance which to a considerable extent precludes the study of what one may truthfully designate every day subjects is the restless furor for artful counterfeits of science which are nothing else than the emanations of vain and visionary minds mixing together as it were an amalgam of truth and error The present age is wonderfully productive of these eccentric ideas while at the same time it is unhappily pregnant with the most unnatural and anti healthful habits The mystified authors take good care to run into the wildest extremes so that their marvellous schemes and quaint devices fortunately for their fellow creatures cause them to be justly derided by the thoughtful and disregarded by the sensible though not a few are caught by the tinsel
