

WAGONS & CARTS

Every medieval villager needs a trusty horse-drawn wagon to get them to the market. Before building your cart or wagon, think about what you want it to carry: food, equipment, passengers? You could even make an armoured battle-wagon with lots of spears and spikes!

BOTTOM VIEW

Many wagons have smaller front wheels than back wheels.

Simple front wheels that don't rotate are a cart, not a wagon or truck.

OFF TO THE MARKET WITH A LOAD OF FRESHLY PICKED BRICKS!

Don't get your steering wheel back straight up.

Modularity of Technic allows you to swap out parts.

WOODEN WAGON

This wagon has plenty of room for carrying supplies from town to town. Build the part that attaches to the horse first to ensure everything is the right height and all four wheels rest the ground to roll evenly.

TURNING THE WAGON

As the horse changes direction, it turns the front axle, which pulls the rest of the wagon along behind. You can use different pieces to make a turning wagon, from a turntable to a LEGO Technic pin.

Round Technic plate is attached to a turntable allowing front axle to turn.

Make sure wheels aren't touching the back of wagon when it turns.

If you don't have a LEGO Technic pin, you can use a LEGO Technic axle.

BUILDING BRIEF

- Objectives:** Create carts and wagons
- Uses:** Travel, transportation
- Features:** Pulled by horse, carry loads
- Extras:** Carbons, repair tools, horse tail

HORSE-DRAWN CART

Unlike a wagon, a cart has two wheels so it doesn't need a steering mechanism. There are lots of ways to connect a horse to a cart! This one uses long base plates with side rings.

A CART APART

The carriage is attached to the base with LEGO Technic half beam. A plate with two rings underneath holds the cross axle in place.

GREEN WAGON

This wagon uses a single harness piece to connect the horse to the steerable front axle. Design your wagon around any special tool you have, and then customize it to suit however you want!
