The Male Brain Louann Brizendine:

The Male Brain Louann Brizendine, 2011 MEN S STUDIES A highly accessible book that is an owner s manual for every man and a cheat sheet for for every woman It s a deep dive into the worlds of men as well as a fascinating read you will pick up some valuable tips to help you understand appreciate and connect with the men in your life Helen Fisher Ph D author of Why Him Why Her

The Female Brain Louann Brizendine, MD, 2007-08-07 Since Dr Brizendine wrote The Female Brain ten years ago the response has been overwhelming This New York Times bestseller has been translated into more than thirty languages has sold nearly a million copies between editions and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages to help men better understand the girls and women in their lives and to illuminate the delicate emotional machinery of a love relationship Why are women more verbal than men Why do women remember details of fights that men can t remember at all Why do women tend to form deeper bonds with their female friends than men do with their male counterparts These and other questions have stumped both sexes throughout the ages Now pioneering neuropsychiatrist Louann Brizendine M D brings together the latest findings to show how the unique structure of the female brain determines how women think what they value how they communicate and who they love While doing research as a medical student at Yale and then as a resident and faculty member at Harvard Louann Brizendine discovered that almost all of the clinical data in existence on neurology psychology and neurobiology focused exclusively on males In response to the overwhelming need for information on the female mind Brizendine established the first clinic in the country to study and treat women s brain function In The Female Brain Dr Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain body behavior The result women will come away from this book knowing that they have a lean mean communicating machine Men will develop a serious case of brain envy

Pink Brain, Blue Brain Lise Eliot, 2009-09-02 A scientific study of the differences between boys and girls that tackles damaging gender stereotypes and offers practical guidance for parents and educators In the past decade we've heard a lot about the innate differences between males and females so we've come to accept that boys can't focus in the classroom and girls are obsessed with relationships In Pink Brain Blue Brain neuroscientist Lise Eliot turns that thinking on its head Presenting the latest science from birth to puberty Eliot zeroes in on the precise differences between boys and girls reining in harmful stereotypes She argues convincingly that infant brains are so malleable that what begins as small differences at birth become amplified over time as parents and teachers and the culture at large unwittingly reinforce gender stereotypes The good news is that by appreciating how sex differences emerge rather than assuming them to be fixed biological facts we can help all children reach their fullest potential Eliot offers teachers and parents concrete ways to help close the troubling gaps between boys and girls ultimately end the gender wars that currently divide us Masculinity and Popular Television Rebecca Feasey, 2008 An introduction to the key debates concerning the representation of masculinities in contemporary television programming **How the French Invented Love** Marilyn Yalom, 2012-10-23 Absolutely marvelous lively and learned

Marilyn Yalom's book is a distinguished contribution to our experience of a great literature as well as an endearing memoir. Diane Johnson, author of *Lulu in Marrakech* and *Le Divorce*, an enchanting tour of French literature from Abelard and Heloise in the 12th century to Marguerite Duras in the 20th and Philippe Sollers in the 21st. Publishers Weekly starred review: *How the French Invented Love* is an entertaining and masterful history of love. la fran aise by acclaimed scholar Marilyn Yalom. Spanning the Middle Ages to the present, Yalom explores a love-obsessed culture through its great works of literature, from Molière's comic love to the tragic love of Racine, from the existential love of Simone de Beauvoir and Jean-Paul Sartre to the romanticism of George Sand and Alfred de Musset. A thoroughly engaging homage to French culture and literature interlaced with the author's delicious personal anecdotes. *How the French Invented Love* is ideal for fans of Alain de Botton. Adam Gopnik and Simon Schama. Sexualized Brains Nicole C. Karafyllis, Gotlind Ulshöfer, 2008. The now popular idea that emotions have an intelligent core and the reverse that intelligence has an emotional core comes from the neurosciences and psychology. Similarly, the fundamental sexualization of the brain, the new interest in essential differences in male and female brains and behaviors is based on neuroscience research and neuroimages of emotions. In *Sexualized Brains*, scholars from a range of disciplines reflect on the epistemological claims that emotional intelligence (EI) can be located in the brain and that it is legitimate to attribute distinct kinds of emotions to the biological sexes. The brain as an icon has colonized the humanities and social sciences, leading to the emergence of such new disciplines as neurosociology, neuroeconomics, and neurophilosophy. Neuroscience and psychology now have the power to transform not only the practice of science but also contemporary society. These developments, the essays in this volume show, will soon affect the very heart of gender studies. *The Other Side of the Coin* David Orrell, 2008. Part economic theory, part popular history, and part manifesto, this book offers a comprehensive look at emerging economic ideas and will change the way you think about money. National Journal, 2010. New Books on Women, Gender and Feminism, 2010. **Reading Group Choices 2008** Reading Group Choices, 2007-09. A list of fiction and non-fiction books with summaries, author biographies, and conversation starters. Men's Health, 2007. *Elle*, 2007-02. *The Elephant in the Classroom* Jo Boaler, 2009. 15 million adults in England alone struggle with maths: why is this and how can teachers and parents change that with the next generation? This is a practical explanation of what has gone wrong and a positive approach to improving how students of all abilities can learn mathematics.
