Modeling And Control Link Springer:

Providing Integrity, Awareness, and Consciousness in Distributed Dynamic Systems Peter Simon Sapaty, 2024-04-15 The ideas of this book originate from the mobile WAVE approach which allowed us more than a half century ago to implement citywide heterogeneous computer networks and solve distributed problems on them well before the internet The invented paradigm evolved into Spatial Grasp Technology and resulted in a European patent and eight books The volumes covered concrete applications in graph and network theory defense and social systems crisis management simulation of global viruses gestalt theory collective robotics space research and related concepts The obtained solutions often exhibited high system qualities like global integrity distributed awareness and even consciousness This current book takes these important characteristics as primary research objectives together with the theory of patterns covering them all This book is oriented towards system scientists application programmers industry managers defense and security commanders and university students especially those interested in advanced MSc and PhD projects on distributed system management as well as philosophers psychologists and United Nations personnel

Advances on Mathematical Modeling and Optimization with Its Applications Gunjan Mukherjee, Biswadip Basu Mallik, Rahul Kar, Aryan Chaudhary, 2024-03-28 *Advances on Mathematical Modeling and Optimization with Its Applications* discusses optimization equality and inequality constraints and their application in the versatile optimizing domain It further covers non linear optimization methods such as global optimization and gradient based non linear optimization and their applications Discusses important topics including multi component differential equations geometric partial differential equations and computational neural systems Covers linear integer programming and network design problems along with an application of the mixed integer problems Discusses constrained and unconstrained optimization equality and inequality constraints and their application in the versatile optimizing domain Elucidates the application of statistical models probability models and transfer learning concepts Showcases the importance of multi attribute decision modeling in the domain of image processing and soft computing The text is primarily for senior undergraduate and graduate students and academic researchers in the fields of mathematics statistics and computer science

Advances in Computers Suyel Namasudra, 2021-06-08 *Advances in Computers* Volume 123 presents innovations in computer hardware software theory design and applications with this updated volume including new chapters on Downlink Resource Allocations of Satellite Airborne Terrestrial Networks Integration Evaluating Software Testing Techniques A Systematic Mapping Study The Screening Phase in Systematic Reviews Can we speed up the process A Survey on Cloud Based Video Streaming Services and User Behavior Ensemble Learning based Improving QoE Fairness in HTTP Adaptive Streaming over SDN approach Contains novel subject matter that is relevant to computer science Includes the expertise of contributing authors Presents an easy to comprehend writing style

Ophthalmic Epidemiology Ching-Yu Cheng, Tien Yin Wong, 2022-05-24 *Ophthalmic Epidemiology* Current Concepts to Digital Strategies provides a comprehensive guide to

graduate students ophthalmologists and researchers in ophthalmic epidemiology It covers recently developed new methodologies technologies and resources in ocular epidemiological research such as telemedicine disease registries EMR bio banks and omics This book also summarizes recent epidemiological findings and provides up to date data on ocular diseases Furthermore it introduces and discusses the uses of epidemiology in the evaluation of health services and population screening programs and reviews the application of epidemiology in intervention trials in the communities Key Features Comprehensive guide to the epidemiology of common eye diseases Provides updates on the prevalence and risk factors of eye diseases Outlines how epidemiological techniques can be utilized to evaluate ophthalmic health services and programs

A Handbook of Artificial Intelligence in Drug Delivery Anil K. Philip, Aliasgar Shahiwala, Mamoon Rashid, Md Faiyazuddin, 2023-03-27 A Handbook of Artificial Intelligence in Drug Delivery explores the use of Artificial Intelligence AI in drug delivery strategies The book covers pharmaceutical AI and drug discovery challenges Artificial Intelligence tools for drug research AI enabled intelligent drug delivery systems and next generation novel therapeutics broad utility of AI for designing novel micro nanosystems for drug delivery AI driven personalized medicine and Gene therapy 3D Organ printing and tissue engineering Advanced nanosystems based on AI principles nanorobots nanomachines opportunities and challenges using artificial intelligence in ADME Tox in drug development commercialization and regulatory perspectives ethics in AI and more This book will be useful to academic and industrial researchers interested in drug delivery chemical biology computational chemistry medicinal chemistry and bioinformatics The massive time and costs investments in drug research and development necessitate application of more innovative techniques and smart strategies Focuses on the use of Artificial Intelligence in drug delivery strategies and future impacts Provides insights into how artificial intelligence can be effectively used for the development of advanced drug delivery systems Written by experts in the field of advanced drug delivery systems and digital health

Smart Technologies and Digital Transformation in Additive Manufacturing K. Sripriyan, J. Paulo Davim, 2025-12-29 The book presents the advancements and innovations in the field of additive manufacturing and its applications in diverse sectors such as medical automotive agriculture aviation and food processing It further addresses the cutting edge breakthroughs in intelligence systems including artificial intelligence machine learning augmented reality and learning algorithms and their impact on welding 3D printing and smart materials This book covers hybrid mode of troubleshooting techniques in additive manufacturing and data driven intelligence for enhanced production highlights the implementation of intelligent systems such as artificial intelligence machine learning augmented reality and learning algorithms in additive manufacturing discusses intelligent methodology for design technology and materials optimization for wire arc additive manufacturing presents additive manufacturing applications in diverse areas such as agriculture aviation automotive medical and food processing and addresses the cutting edge advancements in functionally graded materials within the realm of additive manufacturing The text is primarily written for senior undergraduates graduate
