sales tax, sales, coupon and tips

Sales tax is a fee that stores charge customers on top of the price of items. This money goes to the government. Sales tax is usually added to the price of items after any discounts are applied. For example, if a shirt costs \$50 and you get a \$2 discount, the sales tax is calculated on the \$48 price, not the original \$50 price.

Sometimes, stores offer coupons. Coupons can be from the store or from the company that made the product. If the coupon is from the store, the sales tax is calculated on the price after the discount. But if the coupon is from the company, the sales tax is calculated on the original price.

Stores also give discounts for paying early. This means that if you pay your bill before the due date, you might get a small discount on the amount of sales tax you owe. Different states have different rules about how much of a discount they offer.

It can be confusing to figure out how sales tax works with discounts and coupons. It's important to ask the store clerk if you have any questions. They can help you understand how much you will pay for your items, including sales tax.
