□ The Model Context Protocol: Unifying AI Communication Etienne Noumen, *The Model Context Protocol: Unifying AI Communication*. This episode introduces the Model Context Protocol (MCP), an open standard designed to enable seamless communication between AI agents and external data sources or tools, much like a universal adaptor. It addresses the N/M integration problem where connecting numerous AI models to various tools creates an unsustainable development burden. The show explains MCP's three-tier architecture consisting of a Host (the user-facing application), an MCP Client (which manages sessions), and an MCP Server (which translates requests for data sources like databases or APIs). Furthermore, it details how MCP uses JSON RPC 2.0 for messaging and supports dynamic discovery of capabilities alongside critical security principles for implementation. Finally, it distinguishes MCP from other standards, highlighting its complementary role with the Agent-to-Agent (A2A) Protocol for multi-agent collaboration.
