Lu,2021-06-16 This book s primary objective is to educate aspiring finance professionals about mathematics and computation
in the context of financial derivatives The authors offer a balance of traditional coverage and technology to fill the void
between highly mathematical books and broad finance books The focus of this book is twofold To partner mathematics with
corresponding intuition rather than diving so deeply into the mathematics that the material is inaccessible to many readers
To build reader intuition understanding and confidence through three types of computer applications that help the reader
understand the mathematics of the models Unlike many books on financial derivatives requiring stochastic calculus this book
presents the fundamental theories based on only undergraduate probability knowledge A key feature of this book is its focus
on applying models in three programming languages R Mathematica and EXCEL Each of the three approaches offers unique
advantages The computer applications are carefully introduced and require little prior programming background The
financial derivative models that are included in this book are virtually identical to those covered in the top financial
professional certificate programs in finance The overlap of financial models between these programs and this book is broad

Matters related to sustainable development albeit global in nature are best handled at the local level This line of thinking is
particularly true to the higher education context where the design and implementation of sustainability initiatives on
campuses can demonstrate how a given university translates the principles of sustainable development into practice at the
institutional level Yet there is a paucity of specific events where a dialogue among sustainability academics and practitioners
concerned with a research projects b teaching and c planning and infra structure leading to campus greening takes place so
as to allow a transdisciplinary and cross sectoral exchange of ideas and experiences on the issues matters and problems at
hand It is against this background that this book has been prepared It is one of the outcomes of the First Symposium on
Sustainability in University Campuses SSUC 2017 organised by the University of S o Paulo in Brazil Manchester Metropolitan
University UK the Research and Transfer Centre Applications of Life Sciences of the Hamburg University of Applied Sciences

Germany and the Inter University Sustainable Development Research Programme IUSDRP This book showcases examples of campus based research and teaching projects regenerative campus design low carbon and zero carbon buildings waste prevention and resilient transport among others It also demonstrates the role of campuses as platforms for transformative social learning and research and explores the means via which university campuses can be made more sustainable The aims of this publication are as follows i to provide universities with an opportunity to obtain information on campus greening and sustainable campus development initiatives from round the world ii to document and promote information ideas and experiences acquired in the execution of research teaching and projects on campus greening and design especially successful initiatives and good practice iii to introduce methodological approaches and projects which aim to integrate the topic of sustainable development in campus design and operations This book entails contributions from researchers and practitioners in the field of campus greening and sustainable development in the widest sense from business and economics to arts administration and environment Engineering World ,1929
