The Last Tournament Dominic Ashbourne, Las Vegas was supposed

to be a weekend of glitter trophies and championship dreams Instead it became a crime scene The Last Tournament is the gripping true story of a casino hotel murder suicide that shattered a cheerleading community and exposed the dark undercurrents of a bitter custody war Beneath the neon lights of the Strip a family conflict that had been building for months reached a devastating breaking point one that would leave children parents and an entire competitive sports world asking how it ever escalated this far What began as a routine competition weekend spiraled into tragedy inside a luxury hotel room As investigators pieced together the final hours a disturbing portrait emerged legal filings stacked high with accusations allegations of control and retaliation mounting emotional pressure and a family court battle that had grown increasingly volatile But this is more than a headline Drawing from court records expert research and domestic violence statistics The Last Tournament pulls back the curtain on The hidden risks surrounding high conflict custody disputes The psychology of control escalation and desperation The performance culture of competitive cheerleading and the parental pressures behind it The legal limits of family courts in predicting violence The ripple effect of murder suicide on children and entire communities

With investigative depth and emotional restraint this book examines not only what happened inside that Las Vegas hotel but why tragedies like this continue to unfold across America every year In a country where hundreds of murder suicides occur annually and where separation is one of the most dangerous moments in a relationship The Last Tournament forces readers to confront uncomfortable questions about warning signs accountability and prevention How does a custody battle become lethal What systems are meant to protect families and where do they fall short And when the applause fades and the trophies are packed away what remains For readers of Ann Rule Kathryn Casey and investigative true crime that goes beyond the surface this is a haunting meticulously examined account of love control image and irreversible loss If you are drawn to real life cases that challenge easy answers and linger long after the final page The Last Tournament will stay with you Scroll up and begin reading today

OpenClaw for Beginners: The Step-by-Step Guide to Building AI

Agents That Actually Work (No Coding Required) Elian Ward, 2026-03-18 You've probably noticed something frustrating about AI chatbots. They're great at conversations, terrible at follow-through. You ask for help organizing your inbox, and it writes you a nice plan. Then nothing happens. You still have 847 unread emails. The AI just sits there waiting for you to do the actual work. That's because chatbots can only talk. They can't touch your computer. They can't send emails, update spreadsheets, or check your calendar at 6am every morning. They're consultants, not employees. OpenClaw is different. It's an AI that runs on your machine and actually does things. People are using it to automate their entire morning routine, handle customer support while they sleep, and build products they sell for real money. One guy made 62,000 in three weeks. Another builds a dozen apps every single day. But here's the problem: most people think this is only for programmers. They see words like GitHub and terminal and assume it's not for them. Meanwhile, complete beginners are setting this up in an afternoon and running businesses from their phones. You probably have questions: Can I really build an AI assistant without knowing how to code? How do I make sure it doesn't do something stupid while I'm sleeping? What can this actually do that's worth the effort? This book answers all of them. It's written for people who don't have a technical background but want the unfair advantage that comes from having an AI working for you around the clock. What you'll learn:

1. How to set up OpenClaw safely so you don't accidentally give it access to things it shouldn't touch. The security chapter comes first for a reason.
2. Your first automation in under 30 minutes. A simple morning briefing that delivers weather, your schedule, and your top tasks to your phone before you're even awake.
3. How to use the Skills marketplace without installing something sketchy. There are 1,700 pre-built automations you can add to your agent. Some are gold. Some are garbage. You'll learn to tell the difference.
4. Real examples of people making money with this. Not vague possibilities, but actual businesses: content creation systems, client automation, product development pipelines. With the exact prompts they used.
5. The architecture for running multiple agents. One handles your clients, another does research, a third manages your content. All controlled from WhatsApp or Telegram.
6. 200 prompts you can copy and paste. Everything from "summarize my unread emails from important people" to "monitor competitor pricing and alert me to changes" to "turn my meeting notes into tasks automatically."
7. Fifteen specific ways people are using OpenClaw to make money. Not theories, working business models with real numbers attached.

This book is for:

1. People running their own business who need to scale without hiring.
2. Freelancers who want their work happening even when they're not working.
3. Anyone creating content who's tired of doing the same research tasks over and over.
4. Professionals buried under emails and meetings who need those hours back.
5. People who tried ChatGPT and thought this would be amazing if it could actually DO things. It's not a history of AI. It's not explaining what machine learning is or how neural networks function. It assumes you don't care about the theory and just want the thing working. It's also honest about the risks. OpenClaw is powerful, which means it can cause real problems if you set it up wrong. Chapter 2 exists to make sure you don't learn that lesson the expensive way. The truth most people miss: Most people will read about OpenClaw, think it

sounds cool and do nothing A small group will actually set it up An even smaller group will use it to build something that makes money or saves them serious time The difference isn't technical skill It's whether you're willing to spend an afternoon learning something new that could change how you work forever If you're ready to stop doing repetitive tasks yourself and start having an AI handle them this guide shows you exactly how
