Google Maps Hacks Rich Gibson, Schuyler Erle, 2006-01-17 Want to find every pizza place within a 15 mile radius Where the dog parks are in a new town The most central meeting place for your class club or group of friends The cheapest gas stations on a day to day basis The location of convicted sex offenders in an area to which you may be considering moving The applications serendipitous and serious seem to be infinite as developers find ever more creative ways to add to and customize the satellite images and underlying API of Google Maps Written by Schuyler Erle and Rich Gibson authors of the popular Mapping Hacks Google

Maps Hacks shares dozens of tricks for combining the capabilities of Google Maps with your own datasets. Such diverse information as apartment listings, crime reporting, or flight routes can be integrated with Google's satellite imagery in creative ways to yield new and useful applications. The authors begin with a complete introduction to the standard features of Google Maps. The adventure continues with 60 useful and interesting mapping projects that demonstrate ways developers have added their own features to the maps. After that's given you ideas of your own, you learn to apply the techniques and tools to add your own data to customize and manipulate Google Maps. Even Google seems to be tacitly blessing what might be seen as unauthorized use, but maybe they just know a good thing when they see one. With the tricks and techniques you'll learn from Google Maps Hacks, you'll be able to adapt Google's satellite map feature to create interactive maps for personal and commercial applications for businesses ranging from real estate to package delivery to home services, transportation, and more. Includes a foreword by Google Maps tech leads Jens and Lars Rasmussen. Observer's Handbook 2009, 2008 **PC Magazine**, 2005 *Spooked* Barry Meier, 2021-05-18. A Pulitzer Prize-winning investigative journalist's journey into a billion-dollar secret industry that is shaping our world: the booming business of private spying operatives for hire retained by companies, political parties, and the powerful to dig up dirt on their enemies and if need be, destroy them. For decades, private eyes from Allan Pinkerton, who formed the first detective agency in the U.S., to Jules Kroll, who transformed the investigations business by giving it a corporate veneer, private spies were content to stand in the shadows. Now that is all changing. High-profile stories grabbing recent headlines: the Steele Dossier, Black Cube, the Theranos scandal, Harvey Weinstein's attacks on his accusers—all share a common thread: the involvement of private spies. Today, operatives for hire are influencing presidential elections, the news media, government policies, and the fortunes of companies. They are also peering into our personal lives as never before, using off-the-shelf technology to listen to our phone calls, monitor our emails, and decide what we see on social media. Private spying has never been cheaper, and the business has never been more lucrative, just as its power has never been more pervasive. *Spooked* is a fast-paced, disturbing, and at times hilarious tour through the shadowlands of private spying and its inhabitants: a grab-bag collection of ex-intelligence operatives, former journalists, and lost souls. In this hidden world, information is currency, double crosses are commonplace, and hacking can be standard procedure. Drawing on his journalistic expertise and unique access to sources, Barry Meier uncovers the secrets private spies want to keep hidden. *Annual Report of the Carnegie Free Library, Allegheny, Pa.* Carnegie Free Library (Allegheny, Pa.), 1906 **The Northwestern Reporter**, 1891 *United States Compiled Statutes, Annotated, 1916* United States, 1923 Division and Reunion Woodrow Wilson, 1902 A Bibliography of American Natural History: The institutions founded or organized between 1845 and 1865.
