The Basics of Chemical Reactions Krista West, 2013-12-15 The chemical reactions that shape the world are sometimes simple and sometimes complex, which is at the very core of this informative text. This volume explores the simplicity of basic chemical reactions and then builds to the more complex, giving readers a history of the years and the minds that contributed to the research that led to chemistry as we know it today. Biographical sidebars provide unique information about scientists who are valued in the field but are often not widely known.

Mystery Rufus King, 1928 Make Science Fun: Experiments Jacob Strickling, 2017-11-06 Make Science Fun 2 intended for an older, more serious age group of 8-15 is designed for children to do actual science experiments, not just science activities at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities which are fun to do, help learn science, but a fun science activity isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment, you need to take measurements, make observations, and control variables. With space to write hypotheses, record results, make observations, and draw graphs required, Make Science Experiments is a strong foundation on which to build student awareness of the importance of science in everyday lives.

SELLING POINTS Science experiments for the kitchen, garage, or workshop, bathroom, and garden. Bonus projects perfect for a science fair or school project. Projects using only basic products that can be found in every home kitchen or bathroom. Make Science Fun banishes the science is boring stereotype through fun experiments that children can do alone or with friends or parents. The author's YouTube channel.
