Computer Programming in BASIC the Easy Way Douglas D. Downing,1989 Explains the principles of computer
programming in BASIC and includes exercises with answers *Making the Majors* Eric M. Leifer,1995 In this in depth look
at major league sports Eric Leifer traces the growth and development of major leagues in baseball football basketball and
hockey and predicts fundamental changes as the majors pursue international expansion He shows how every past expansion
of sports publics has been accompanied by significant changes in the way sporting competition is organized With each
reorganization the majors have created teams closer in ability bringing repetition to competition across time only to expand
and energize the public s search for differences between teams and for events that disrupt the repetitive flow The
phenomenal success of league sports Leifer writes rests on their ability to manufacture inequalities for fans to latch on to
without jeopardizing the equalities that draw fans in Leifer supports his theory with historical detail and statistical analysis
He examines the special concerns of league organizers in pursuing competitive balance and presents a detailed analysis of
how large city domination has been undermined in the modern era of Major League Baseball Using games from the four
major league sports he then shows how fans can themselves affect the course of competition In NFL football for example fans
account for nearly all of the persisting inequality in team performance The possibility of sustaining inequality among equals
emerges from the cross pressures that fans and leagues place on competition With substantial data in hand Leifer asks the
essential question facing the leagues today how can they sustain a situation that depends entirely on simultaneous equality
and contention one in which fan involvement may evaporate as soon as one team dominates His answer has significant
implications for the future of major league sports both nationally and internationally **Football Math** Jack A.
Coffland,David A. Coffland,1994-10 Uses a variety of football situations facts and statistics in problems involving arithmetic
fractions decimals and percentages
