Tutorial Hassan K. Reghbati, Anson Y. C. Lee, 1988 Constructing Music Teresa M.

Nakra,2024 Why does music exert such a strong pull on us How does it work Traditional courses in music fundamentals give students a basic understanding of the building blocks of music and how to put them together to make a result that produces an intended effect Constructing Music Musical Explorations in Creative Coding takes students a step further through a series of step by step tutorials and lessons author Teresa M Nakra presents a new method for teaching music fundamentals that foregrounds creative coding practices and builds upon the computing skills that today s students already possess By encouraging experimentation with computer code this book gives students tools to actively investigate simulate and engage with the structure of music ultimately leading to greater understanding about the processes that underlie music s power over us Designed to support computer based learning in tonal harmony musicianship and music theory Constructing Music avoids the lens of Western music notation and instead explains music content through analogies with toy bricks and references ideas from creative technology engineering and design Students also engage directly with the components of musical structure using editable short code patches developed in Max a visual coding environment for interactive music audio and media Dozens of patches accompany the book and allow readers to play with the building blocks of sound reinforcing each topic by tinkering modifying and creating their own versions of the material Each chapter explains core music theory concepts in detail and supports every description through code simulations progressing through the topics with increasing complexity In the final chapter Nakra explores the questions and theories that emerge from the lessons considering the role of music as a proto form of AI and its impacts on emotion wellness and creativity
