Body/State Jen Dickinson, 2016-04-08 Body State brings together original essays addressing various aspects of the evolving interaction between bodies and states While each essay has different empirical and or theoretical focus authors consider a number of overlapping themes to appreciate the state s engagement with and concern about bodies Divided into five parts the first part Bodies Modified and Divided considers how the production regulation policing and maintenance of borders physical social sexual political religious etc are used to enable or constrain the physical re shaping of the body Part two Capital Bodies

extends the state's concern with the flows of bodies that make up the nation to consider how they are enrolled in the complex structures of capitalist exchange that form the basis for maintaining and contesting a set of relationships between states and markets. Part three, Deviance and Resistance, examines both how states seek to discipline non-normal bodies and appreciates the capacity of changes in the socio-cultural meaning and nature of bodies to resist and/or escape states. Part four, Sovereignty and Surveillance, develops themes of deviancy and resistance by considering the impact of new technologies both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. Finally, Part five, The Body Virtual, examines the impact of new technologies and online spaces both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself. A varied collection of essays that address important and complex topics in a readable and creative way.

Tech, Sex and Health Jennifer Power, Andrea Waling, 2024-07-05. This book presents recent sociological research investigating the intersection of technology, human sexuality, and health. Rapid advances within biomedical, biomechanical, and biodigital domains have prompted scholarly exploration into the ways these technologies are being integrated into or are reshaping human sexual and intimate practices and the resulting health implications. Scholarship has also focused on the potential for new technologies to extend the imagined and real possibilities for enhancing human sexual experiences. The chapters in this book delve into the interconnected themes of sex, health, bodies, and risk in relation to emerging technologies. They illuminate the intricate interplay between human bodies, sexual practices, and technologies; spotlight how novel technologies and human practices collaboratively shape or remodel cultures of sex and intimacy; and critically interrogate the discourses of risk and pleasure that frame our understanding of technology and sex. Researchers within the fields of sociology, technology studies, human sexuality, and health, as well as educators and professionals seeking a comprehensive understanding of how people engage with technologies in their intimate relationships and sex lives, will find this collection engaging and informative. Additionally, individuals interested in the cultural, societal, and ethical implications of emerging technologies in relation to sexual experiences and health will also benefit from the insights presented in this volume. The chapters in this book were originally published in several journals including *Health Sociology Review*, *Journal of Gender Studies*, and *Information Communications Technology Law*.

Women Empowerment and the Feminist Agenda in Africa Musungafi, Maxwell Constantine Chando, Hungwe, Chipso, 2023-10-24. This book argues that African women's lived experiences are often spoken about authoritatively by people who are not included within this demographic, relegating these women to the role of spectators in their own stories. The dominant narratives of African womanhood, legitimized by intellectual discourse, are neither written by African women nor Africans in general. This book seeks to place feminism in Africa into its historical context by revisiting the experiences, practices, vision, and theories of feminism and gender in Africa. It is intended to serve as a comprehensive introduction to the field and provide a starting point for further and more advanced study of the nexus of feminism, gender, and development in Africa. *Women Empowerment and the Feminist Agenda in Africa* is

designed to initiate post graduate research and studies in the social sciences for directed and critical inquiry into the nature of feminist and gender politics and power relations in Africa It is written for researchers academics and advanced tertiary studies although professional gender and feminist organizations especially those in Africa or focusing on Africa will also find a wealth of information The book is recommended for university libraries post graduate students and staff the non governmental community in Africa women movement organizations in Africa independent researchers and academics and the African community at large

The Oxford Handbook of the Archaeology and Anthropology of Body Modification Franz Manni, Francesco d'Errico, 2026-01-23 Body modification practices express identity conform to social norms and convey cultural values that express cultural social and individual meanings The Oxford Handbook of the Archaeology and Anthropology of Body Modification provides a comprehensive understanding of these practices addressing evolving cultures and identities while also revealing the universal human desire to transcend the ordinary and connect with something greater By exploring practices such as cranial shaping teeth filing tattooing body piercing and other modifications this comprehensive volume sheds light on the evolution and diversification of body modification across time and space The Handbook's opening chapters synthesize the origins of body modification examining the chronological emergence of clothing body painting and adornments across continents to introduce the deep connections between body modifications and social identity focusing on rituals gender and symbolism in historical and archaeological contexts Later chapters delve into cranial and dental modifications tattooing and body piercing examining the cultural significance of these practices and the methods used to perform them The final sections of the Handbook address other body alterations including genital modifications and finger amputation Museum collections are also examined presenting a wide array of artifacts and visual media including human remains showing how they can be studied to understand past cultural contexts in a novel way Throughout the Handbook Indigenous perspectives and methodologies are highlighted offering insight into the amuletic function of tattoos and the relational practice of body modifications It is important to note that colonization has stopped the cultural transmission of many of these practices the value and dignity of which the Handbook attempts to restore Taken together the chapters in The Oxford Handbook of the Archaeology and Anthropology of Body Modification represent a unique and groundbreaking synthesis of scholarship on this widespread yet often misunderstood aspect of human culture
