of the world's most recognizable buildings. The era witnessed interest rates dropping to historic lows but later subprime became one of the most searched terms on Google as the nation teetered on recession. Big was in like never before and suddenly people nationwide could buy or build their own McMansion, a slice of the American dream. While supersized homes and fast food meals became commonplace, the electronics and transportation advances proved that good things came in increasingly smaller packages. Apple's iPod reinvented how people interacted with music, hybrids changed thoughts on fuel efficiency as a gallon of gas topped \$3. Cell phone usage ballooned in our always-on society while physically shrinking to the size of a deck of cards. Yes, me-centric Pop Culture 2.0, which the pundits predicted would some day arrive, burst onto the scene and ultimately transformed the way we interact with one another and the world around us.

Chapters inside the latest volume in the American Popular Culture Through History series explore various aspects of popular culture including advertising, literature, leisure activities, music, visual arts, and travel. Supplemental resources include a timeline of important events, cost comparisons, and an extensive bibliography for further reading.

The Use of Social Media and the Academic Performance of Students Amos Mathias, 2019-03-12. Master's Thesis from the year 2019 in the subject Communications Multimedia Internet New Technologies grade 72.0 Coventry University School of Engineering Environment and Computing course MSc Management of Information Technology language English abstract. The thesis aims at exploring the use of social media to improve students' academic performance in Nigeria. The study is guided by the interpretivist theoretical perspective which follows a qualitative approach. The findings reveal that Taraba State University students have access to social media but there is no official social media platform to build learning communities for the improvement of students' academic performances in the university. In recent times, institutions of higher learning around the world are exploring various technologies that encourage active learning. One of such technologies is the use of social media in building learning communities. Learning communities have assisted students' learning process by means of collaboration, sharing of ideas and information in their respective subject areas. This is in accordance with the benefits of mobile technologies and ubiquitous computing, internet of a thing, and emerging technologies such as web 2.0 and social networking that has captivated the attention of students globally. It is this development that has triggered this research on use of social media to improve students' academic performance in Nigeria. The study is guided by the interpretivist theoretical perspective which follows a qualitative approach. The case study method and triangulation sampling are employed for indepth data collection. Interviews, online survey, and observation are used as sources of primary data collection. Constant comparative analysis method is used to analyse the data. Social media has become an integral part of people's life as this technology enables people to network with friends and associates, share photographs, generate contents, interact in games, and real time conversations. The ever-increasing proliferation of mobile technologies has increased the use of social media, more especially in universities where the technology is transforming the way students communicate, collaborate, interact, and learn.
