Innovation Management provides a comprehensive overview of innovation theory and a framework for implementation intended for business school students, innovation management managers, and practitioners alike. In this new text, authors Jin Chen and Gang Zheng examine innovation from the perspectives of strategy, internal processes, resource management, and organizational culture. Numerous case studies illustrating both successes and failures in innovation include Tesla, P.G. Apple, Uber, Google, NVIDIA, Haier Group, Motorola, and Nokia. Starting from a systematic introduction to the types, process, and models of innovation, the authors present a strategic management framework that includes models for indigenous innovation, total innovation, open innovation, and holistic innovation. They outline the key roles played by management of capital, information, and knowledge systems, human resources, and IP rights. Organizational systems that are designed to stimulate innovation within the corporation are detailed, and finally, the authors examine the future of innovation management, focusing on the need for sustainable innovation that recognizes the importance of environmental and ecological concerns.
