Reading and Language Arts

Passage: A Boat Trip

Explanation

Answer: The first part following an introductory phrase containing an action must be the person or thing that would do that action.

Identify the action in the introductory phrases. Then, choose the answer in which the independent clause begins with the noun that does the action.

When collecting the data, the scientist predicts when and how often the fish will release protection during their journey to the coast.

The information that immediately follows the introductory phrase "When collecting the data" must be something that collects data. Remember the thing that collects data is the scientist, the correct answer must start the independent clause with the scientist as the subject.

Therefore, the answer that best completes the sentence states that the scientist predicts when and how often fish will release protection during their journey to the coast.
