Lane Pederson, Psy D, LP, DBTC, author of *The Expanded Dialectical Behavior Therapy Skills Training Manual* and *DBT Skills Training for Integrated Dual Disorder Treatment Settings* **TECHNOLOGY IN MENTAL HEALTH** Stephen Goss, Kate Anthony, LoriAnne Sykes, Stretch, DeeAnna Merz, Nagel, 2016-07-01 In the half-decade since publication of the first edition, there have been significant changes in society brought about by the exploding rise of technology in everyday lives that also have an impact on our mental health. The most important of these has been the shift in the way human interaction itself is conducted, especially with electronic text-based exchanges. This expanded second edition is an extensive body of work. It contains 39 chapters on different aspects of technological innovation in mental health care from 54 expert contributors from all over the globe, appropriate for a subject that holds such promise for a worldwide clientele and that applies to professionals in every country. The book is now presented in two clear sections: the first addressing the technologies as they apply to being used within counseling and psychotherapy itself, and the second section applying to training and supervision. Each chapter offers an introduction to the technology and discussion of its application to the therapeutic intervention being discussed, in each case brought to life through vivid case material that shows its use in practice. Chapters also contain an examination of the ethical implications and cautions of the possibilities these technologies offer now and in the future. While the question once was "should technology be used in the delivery of mental health services," the question now is "how to best use technology with whom and when." Whether one has been a therapist for a long time or is a student or simply new to the field, this text will serve as an important and integral tool for better understanding the psychological struggles of one's clients and the impact that technology will have on one's practice. Psychotherapists, psychiatrists, counselors, social workers, nurses, and in fact every professional in the field of mental health care can make use of the exciting opportunities technology presents.
