Covers the three client side technologies HTML5, CSS and JavaScript in depth with no dependence on server side technologies. One of the distinguishing features of this new text is its coverage of canvas, one of the most important new features of HTML5. Topics are presented in a logical, comprehensive manner and code is presented in both short code fragments and complete web pages, allowing readers to grasp concepts quickly and then apply the concepts in the context of a complete web page. Each chapter concludes with an optional case study which builds upon itself to create a sophisticated website.
