The Architecture of Constitutional Amendments Richard Albert,2023-05-18 This innovative book blends constitutional theory with real life political practice to explore the impact of codifying constitutional amendments on the operation of the constitution in relation to democracy the rule of law and the separation of powers It draws from comparative historical political and theoretical perspectives to answer questions all constitutional designers should ask themselves Should the constitution append amendments sequentially to the end of the text Should it embed amendments directly into the existing text with notations about what has been modified and how Should it instead insert amendments into the text without indicating at all that any alteration has occurred The book examines the 3 major models of amendment codification the appendative the integrative and the invisible models and also shows how some jurisdictions have innovated alternative forms of amendment codification that combine elements of more than 1 model in a unique hybridisation driven by history law and politics Constitutional designers rarely consider where in the constitution to codify amendments once they are ratified Yet this choice is pivotal to the operation of any constitution This groundbreaking book shows why the placement of constitutional amendments goes well beyond mere aesthetics It influences how and whether a people remembers its past how the constitutional text will be interpreted and by whom and whether the constitution will be easily accessible to the governed A global tour of the high stakes of constitution making this book features 18 diverse and outstanding scholars from around the world across Africa America Asia and Oceania and Europe raising new questions opening our eyes to new streams of research and uncovering new possibilities for constitutional design

groundwater resources in Ethiopia and its various dimensions groundwater as resource environmental functions and
socioeconomics The prevailing knowledge of groundwater resources in Ethiopia or elsewhere in Sub Saharan Africa was
based on geological and stratigraphic framework known nearly four decades ago mainly 1960 s and 70 s Thanks to the
substantial geoscientific research since the 70 s a new set of relevant geological stratigraphic data has been created that
helps to re define our understanding of groundwater resources in Africa as a whole and in Ethiopia in particular a For the
first time the basement aquifer of Ethiopia has been described hydrogeologically based on genesis of regoliths deep
weathering and striping history clear regional difference in groundwater potential is shown for the first time comparative
accounty has been given regarding groundwater occurrence in the generally low grade basement rocks of Ethiopia Arabian
Nubian shield and high grade basement rocks of the rest of Africa b For the first time groundwater occurrence in multilayered
sedimentary rocks account for spatial variation in degree of karstification deformation history and stratigraphy c The vast
volcanic aquifers of Ethiopia which have previously classified based on their ages are now reclassified based on age
morphology eg groundwater in plateau volcanics groundwater in shield volcanics and aquifer structure d The loose alluvio
lacustrine sediments which were known as least extensive in previous works based on areal cover are in fact shown to host
the most voluminous groundwater resources in Ethiopia These aquifers have now been described based on their
