1. Based on the grid below, identify each function below as being a linear or a non-linear function.

2. Identify each of the functions below that are **linear**. If they are linear, write the slope and y-intercept. If they are not linear, explain why.

This is being presented with the grid for the same situation.

3. Graph each of the functions part 2 on the grid below and use the grid to determine if each is linear or not linear. If it is linear, write the slope and y-intercept.

Remember, the functions above that are not linear are not linear because they do not have a constant slope.
