Cells To Systems

Multicellular Organisms

- Multicellular organisms form when a group of individual cells function together
- These organisms can complete new functions due to the collective action of many cells combining to create synergistic effects

Cells → tissues → organs → systems

For example

Muscle Cells → cardiac tissue → heart organ → cardiovascular system

Tissues are clusters of cells which perform a shared function.

An **Organ** is a combination of tissues and cells into a distinct structure that forms a specific function.

A **system** is a collection of organs and tissues that perform specific functions necessary for survival.
