Obesity Prevention Laurette Dube, 2010-06-25 Over the years, approaches to obesity prevention and treatment have gone from focusing on genetic and other biological factors to exploring a diversity of diets and individual behavior modification interventions anchored primarily in the power of the mind to the recent shift focusing on societal interventions to design temptation-proof physical, social, and economic environments. In spite of repeated calls to action, including those of the World Health Organization (WHO), the pandemic continues to progress. WHO recently projected that if the current lifestyle trend in young and adult populations around the world persists by 2012, in countries like the USA, health care costs may amount to as much as 17.7% of the GDP. Most importantly, in large part due to the problems of obesity, those children may be the first generation ever to have a shorter life expectancy than that of their parents. *Obesity Prevention* presents the most current research and proposals for addressing the pandemic. Past studies have focused primarily on either genetic or behavioral causes for obesity; however, today's research indicates that a strongly integrated program is the best prospect for success in overcoming obesity. Furthermore, focus on the role of society in establishing an affordable, accessible, and sustainable program for implementing these lifestyle changes is vital, particularly for those in economically challenged situations who are ultimately at the highest risk for obesity. Using studies from both neuroscience and behavioral science to

present a comprehensive overview of the challenges and possible solutions The brain to society approach to obesity prevention focuses on what is needed in order to sustain a healthy pleasurable and affordable lifestyle Explores the brain to society approach to obesity prevention focusing on an integrative approach to addressing the obesity pandemic Presents both the neuroscientific and the behavioral factors that impact eating habits Identifies the challenges and suggests solutions for altering attitudes toward food on both an individual and a societal level *The Northwestern Miller* ,1930 **Nutrition Abstracts and Reviews** ,2003 **Journal of the American Dietetic Association** ,2001 **Audio-visual Catalog** University of Minnesota. Agricultural Extension Service,1958 **The American Journal of Clinical Nutrition** ,1998-04 **Proceedings** ,1975 **Journal of Pediatric Gastroenterology and Nutrition** ,1991-07
