**The vision, tr. by H.F. Cary, revised by P. Toynbee** Dante Alighieri, 1900 **Not Another U.S. History Textbook** Adam Strube, 2024-01-15 Why on earth would two history nerds use their own free time to write another US history textbook Well that intelligent human is the right question This work breaks from the traditional memorization of who what when where and focuses on why and how The former is popular in schools due to its efficiency in quantification for testing You're either right or wrong about remembering facts But it's so boring that most students turn off their brains once they set foot in the class and that habit continues well into old age if not recognized and corrected Why and how are more subjective therefore harder to grade But with their asking people become re-centered in our collective story where they belong Only then can proper context be understood and criticism and perspective be applied We believe this approach to be the missing link in our education and understanding of current issues norms and discussion points Hopefully after reading this work each reader's critical thinking will activate around all history permanently That will certainly aid humanity's evolution and communication Wait does that mean this book can be categorized as self help Argue away **The Lancet**, 1901 [The Red](#)

Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion  
particularly for students with marginalized identities This poses problems particularly when science permeates every aspect  
of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white  
cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt  
systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective  
isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to  
transformative environments manifesting respect for students social and educational capital We must create a STEM  
environment in which students with marginalized identities feel respected listened to and valued We must assist students in  
understanding how their positionality privilege and power both historically and currently impacts their meaning making and  
understanding of STEM      **MSDN Magazine** ,2008      *The English Cyclopdia* ,1871
